FOREWORD

This is an index of all items listed in Volumes 1-20 (1940-1959) of Mathematical Reviews. Items are listed under the author's surname chronologically, according to imprint date when this differs from the nominal date. Those by joint authors are listed under the first-named author; all one-author papers are listed first, then all two-author papers, etc.; cross-references are provided from secondary authors to the first. Typically, an entry for a journal article reads:

Pondiczery, E. S. (= Pondicherry) (See also Schark, I. J.)

On automorphisms of the null set. J. Broddingnag.

Acad. Sci. (7) 4 (82) (1952/53), no. 3, 17-42 (1954).

(Hungarian. English summary) (N. Bourbaki) 17-696.

The first parenthesis gives name-variations; these generally appear also in the main alphabetical list with a cross-reference. The second parenthesis gives cross-references to joint authors. The article title is as it appears in the journal, provided the article (or any summary thereof) is in English, French, German or Italian; otherwise the title is translated into English. The journal reference is as printed with the review. [For abbreviations of names of journals, see the annual index issues of Mathematical Reviews, starting with Vol. 9 (1948).] After the abbreviation there is given:

(Series number) volume number (volume number in first series if given) (nominal date), issue number if necessary, first page-last page (imprint date).

If only one date appears on the journal, earlier practice has been to interpret it as imprint date; recent practice, as nominal date. In some cases, when the journal is issued in several subseries, there is given a volume number for the journal as a whole as well as for the subseries; e.g.,

Ann. Univ. Lilliput. 25 Ser. Math. Phys. 7 (1948), 139-174.

After the journal reference, the first parenthesis gives language information when the article (or any summary) is not in one of the four languages above. The second parenthesis names the reviewer. The final item is volume and page of Mathematical Reviews; any second entry here usually refers to an erratum to the review. For a review published in Vol. 20, the page number is replaced by the serial number of the review, and an erratum published in Vol. 20 is indicated by "20 err."

For books and other monographs, the title is given in the language of the original (transliterated if necessary), as well as in English if the original is not in one of the four languages above. The form generally is:

Title. Miscellaneous information (edition, series, etc.). Publisher, city, date.
 Pagination. (Reviewer) Volume-page (or serial number) of review.

An item without a personal author is listed under the editor's name, or alphabetically by title. An individual article in a collection is listed under the author's name only if it was reviewed individually.

The present index is essentially a reproduction of the office files of Mathematical Reviews. The filing system has been far from uniform during the twenty years covered, but it has seemed best not to attempt a full-scale revision of the records at this time; consequently, many inconsistencies will be apparent to the user. The following in particular should be mentioned. (a) Items related to each other—e.g., the Proceedings of a regularly held symposium—may be listed in several places if they do not have a fixed author or editor. (b) The name under which a Russian (or Bulgarian, etc.) author's publications are listed may not be the standard Mathematical Reviews' transliteration of the Cyrillic, although the latter is usually listed at least for cross-reference. (c) The standard transliteration system was altered somewhat, beginning with Vol. 7. The two systems used are as follows:

Russian -	А	Б	В	Г	Д	Е	Ж	З	И	Й	К	Л	М	Н	О	П	Р	С	Т	У	Ф	Х	Ц	Ч	Ш	Щ	Ъ	Ы	Ь	Э	Ю	Я	
	а	б	в	г	д	е	ж	з	и	й	к	л	м	н	о	п	р	с	т	у	ф	х	ц	ч	ш	щ	ъ	ы	ь	э	ю	я	
New -	a	b	v	g	d	e	zh	z	i	ï	k	l	m	n	o	p	r	s	t	u	f	h	c	ç	š	š	ž	"	y	'	ë	yu	ya

CORRECTIONS AND ADDITIONS

In this volume a black • next to an author's name indicates that a correction or addition to one of his works is listed below.

<u>Name</u>	<u>Page</u>	<u>Col.</u>	<u>Line</u>	
Bari, N. K.	101	1	-22	Replace "148. Mathematika 4, 69-107 (1951)." by "148 (1951); Mat. 4, 69-107."
Beth, Evert W.	155	1	-21	After "No. 13," insert "309-342,"
---	155	1	- 9	Replace "19-625." by "19-625, pp. 357-388-Zbl. 73,249."
Beurling, Arne	156	1	-32	Replace "81, 14 pp. (1948)." by "81 (1949), 225-238."
---	156	1	-30	Replace "81, 17 pp. (1948)." by "81 (1949), 239-255."
Bondi, H.	203	2	27	Before Cambridge Monographs insert "Cosmology."
Botez, Mihail Șt.	217	2		After line 34 insert and paragraph "Contribution to the simplification of the Monge system of projection in a special case. Revista Științifică "V. Adamachi" 32, 126-127 (1946). (Romanian, French summary) 8-388."
Cesari, Lamberto	313	1	- 9	After "Nat." insert "(6)" and replace "(1941)" by "(1940)"
Daskin, Walter	412	1	-26	After "53-55" insert ";addendum, ibid. 28 (1961), 592"
Dixmier, Jacques	457	1	-28	Delete "Cahiers scientifiques, Fascicule XXV."
Dugué, M. D.	482	2	21	Delete "Dugué, M. D." on line 23. After "20 #2736" insert ";22, p. 2544." Consolidate this reference under Dugué, Daniel.
Fényes, Imre	559	1		After line 2 insert the following "Über das Divergenzproblem der W. K. B. Methode. Acta Phys. Acad. Sci. Hungar. 4 (1954), 133-147, (Russian summary) (M.A. Hyman) 19 #651."
Gal'pern, S. A.	630	1	3	After author's name insert "See Halpern, S.". References under both spellings should be consolidated under Halpern, S.
Gaspar, Gyula	643	1	9	After author's name insert "(=Gaspar, Julius)" References under both spellings should be consolidated under Gaspar, Gyula.
Gol'tberg, A. A.	697	2		After line -16 insert "On an inequality connected with logarithmic convex functions. Dopovidi Akad. Nauk Ukrain. RSR 1957, 227-230. (Ukrainian. Russian and English summaries) (Author's summary) 19-950."

<u>Name</u>	<u>Page</u>	<u>Col.</u>	<u>Line</u>	
Hu, Shih-Hua	862	2	12	After author's name insert "(=Hoo, Shih-hua)". References under both spellings should be consolidated under Hu, Shih-Hua
Halpern, S.	775	1	27	After author's name insert "(=Gal'pern, S. A.)". References under both spellings should be consolidated under Halpern, S.
Hodge, William V. D.	839	1	30	After "pp." insert "14-500."
Hoo, Shis-hua and Chen, Chiang-yeh	849	1	27	After author's name insert "See Hu, Shih-Hua." References under both spellings should be consolidated under Hu, Shih-Hua
Hopf, Eberhard	850	1		After line 25 insert "On the application of functional calculus to the statistical theory of turbulence. Applied probability. Proc. Sympos. Appl. Math., Vol. VII, pp 41-50. McGraw-Hill, New York for Amer. Math. Soc., 1957. (W.H.Reid) 19-350."

The notion of mean values. Norske Vid. Selsk. Forh., Trondhjem 19, no. 23, 83-86 (1947). (Beckenbach) 8-504.

A generalization of the notion of convex functions. *Norske Vid. Selsk. Forh.*, Trondhjem 19, no. 24, 87-90 (1947). (Beckenbach) 8-504.

Sur une équation fonctionnelle. *Acad. Serbe Sci. Publ. Inst. Math.* 2, 257-262 (1948). (French. Serbian summary) (Beckenbach) 10-303.

On mean values. *Bull. Amer. Math. Soc.* 54, 392-400 (1948). (Beckenbach) 9-501.

Un problème de M. L. Fejér sur la construction de Leibniz. *Bull. Sci. Math.* (2) 72, 39-45 (1948). (Beckenbach) 10-357.

Sur les opérations définies pour nombres réels. *Bull. Soc. Math. France* 76, 59-64 (1948). (Beckenbach) 10-685.

Über eine Klasse von Funktionalgleichungen. *Comment. Math. Helv.* 21, 247-252 (1948). (Beckenbach) 9-514.

On mean values and operations defined for two variables. *Norske Vid. Selsk. Forh.*, Trondhjem 20, no. 10, 37-40 (1948). (Beckenbach) 9-572.

On some sequences defined by recurrence. *Acta Univ. Szeged. Sect. Sci. Math.* 13, 136-139 (1949). (Beckenbach) 11-511.

New proof and extension of St. Fenyő's theorem on mean values of functions. *Norske Vid. Selsk. Forh.*, Trondhjem 22, no. 1, 1-4 (1949). (Beckenbach) 11-584.

Über Niveauebenen und Flächen von Lösungsfunktionen partieller Differentialgleichungen. *Acta Math. Acad. Sci. Hungar.* 1, 125-132 (1950). (German. Russian summary) (Thomas, J. M.) 12-613.

Zur Charakterisierung nomographisch einfach darstellbarer Funktionen durch Differential- und Funktionalgleichungen. *Acta Sci. Math. Szeged* 12, Leopoldo Fejér et Frederico Riesz LXX annos natis dedicatus, Pars A. 73-80 (1950). (Church) 12-541.

Einige aus Funktionalgleichungen zweier Veränderlichen ableitbare Differentialgleichungen. *Acta Univ. Szeged. Sect. Sci. Math.* 13, 179-189 (1950). (Beckenbach) 13-246.

Inégalité. *Gaz. Mat.*, Lisboa 10, no. 39, 5-7 (1949); no. 40, 5-9 (1949); nos. 41-42, 4-11 (1949); 11, no. 43, 10 (1950). (Beckenbach) 12-12.

Some remarks on recurrent sequences. *Nieuw Arch. Wiskunde* (2) 23, 144-149 (1950). (Beckenbach) 11-511.

Über einparametrische Transformationen. *Publ. Math. Debrecen* 1, 243-247 (1950). (Vanderslice) 12-673.

On quasi-linear functional operations. *Publ. Math. Debrecen* 1, 248-250 (1950). (Phillips) 12-615.

Functional equations in applied mathematics. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közleményei* 1, 131-142 (1951). (Hungarian) (Erdős) 14-286.

Über Funktionalgleichungen mehrerer Veränderlichen. I. Elementare Lösungsmethoden für Funktionalgleichungen mehrerer Veränderlichen. *Mat. Lapok* 2, 99-117 (1951). (Hungarian. Russian and German summaries) (Erdős) 13-466.

On composed Poisson distributions. III. *Acta Math. Acad. Sci. Hungar.* 3, 219-224 (1952). (Russian summary) (Lukacs) 14-770.

Über einige Funktionalgleichungen der Theorie der kontinuierlichen Gruppen. *Comptes Rendus du Premier Congrès des Mathématiciens Hongrois*, 27 Août - 2 Septembre 1950, pp. 565-569. *Akadémi Kiadó*, Budapest, 1952. (Hungarian. Russian and German summaries) (Erdős) 15-100.

Bemerkungen über die Multiplikation von Vektoren und Quaternionen. *Acta Math. Acad. Sci. Hungar.* 3 (1952), 309-316 (1953). (Russian summary) (Kiokemeister) 15-389.

Eine Bemerkung über die Charakterisierung der "Klassischen" orthogonalen Polynome. *Acta Math. Acad. Sci. Hungar.* 4, 315-321 (1953). (Russian summary) (Szegő) 15-621.

Sur les équations fonctionnelles à plusieurs variables. II. *Magyar Tud. Akad. Alkalm. Mat. Int. Közl.* 1 (1952), 311-333 (1953). (Hungarian. Russian and French summaries) 15-324.

Grundriss einer allgemeinen Behandlung von einigen Funktionalgleichungstypen. *Publ. Math. Debrecen* 3 (1953), 119-132 (1954). (Beckenbach) 15-962.

Bemerkungen zur Realisierung der Hausdorffschen Axiome in abstrakten Mengen. *Publ. Math. Debrecen* 3 (1953), 183-186 (1954). (Appert) 16-387.

A solution of some problems of K. Borsuk and L. Jánossy. *Acta Phys. Acad. Sci. Hungar.* 4, 351-362 (1955). (Russian summary) (L. J. Savage) 16-1128.

Zur Theorie der Mittelwerte. *Acta Univ. Debrecen.* 1 (1954), 117-135; additamentum ad 1 (1955), 18. (Hungarian. German summary) 19-126.

Lösung der Vektor-Funktionalgleichung der homogenen und inhomogenen n -dimensionalen einparametrischen "Translation", der erzeugenden Funktion von Kettenreaktionen und des stationären und nichtstationären Bewegungintegrals. *Acta Math. Acad. Sci. Hungar.* 6, 131-141 (1955). (Russian summary) (I. M. Sheffer) 17-272.

Remarques algébriques sur la solution donnée par M. Fréchet à l'équation de Kolmogoroff. *Publ. Math. Debrecen* 4, 33-42 (1955). (J. L. Doob) 16-989.

Beiträge zur Theorie der geometrischen Objekte. I, II, I. Elementarer Beweis der Nichtexistenz von rein differentiellen geometrischen Objekten höherer Klasse als der dritten mit einer Komponente im eindimensionalen Raum. II. Elementare Bestimmung aller rein differentiellen geometrischen Objekte erster, zweiter und dritter Klasse mit einer Komponente im eindimensionalen Raum. *Acta Math. Acad. Sci. Hungar.* 7 (1956), 339-354. (Russian summary) (A. Nijenhuis) 19-677.

Bemerkungen zu einigen Methoden bezüglich der elementaren Lösung von Extremumsaufgaben mittels elementaren Ungleichungen. *Acta Univ. Debrecen* 3 (1956), no. 2, 23-40. (Hungarian. German summary) (T. S. Motzkin) 20 #1738.

On the theory of means. *Colloq. Math.* 4 (1956), 33-55. (Russian) (E. F. Beckenbach) 18-876.

Über Additions- und Subtraktionstheoreme. *Publ. Math. Debrecen* 4 (1956), 325-333. (P. E. Guenther) 18-488.

Some general methods in the theory of functional equations in one variable. New applications of functional equations. *Uspehi Mat. Nauk* (N.S.) 11 (1956), no. 3(69), 3-68. (Russian) (E. F. Beckenbach) 18-807.

Beiträge zur Theorie der geometrischen Objekte. III-IV. III. Spezielle geometrische Objekte mit nicht weniger Komponenten als Parametern. IV. Differentielle geometrische Objekte erster, zweiter und dritter Klasse von beliebiger Komponentenanzahl im eindimensionalen Raum. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 19-52. (A. Nijenhuis) 19-677.

Beiträge zur Theorie der geometrischen Objekte. V. Kovariante ableitungen von differentiellen geometrischen Objekten erster und zweiter Klasse im eindimensionalen Raum. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 53-64. (A. Nijenhuis) 19-677.

A maximum principle for a class of hyperbolic equations and applications to equations of mixed elliptic-hyperbolic type. *Comm. Pure Appl. Math.* 6, 455-470 (1953). (Germain) 15-432.

Agnew, Ralph Palmer.

On oscillations of real sequences and of their transforms by square matrices. *Amer. J. Math.* 61, 683-699 (1939). (Hille) 1-10.

Properties of generalized definitions of limit. *Bull. Amer. Math. Soc.* 45, 689-730 (1939). (Moore, C. N.) 1-50.

On Tauberian theorems for double series. *Amer. J. Math.* 62, 666-672 (1940). (Levinson) 2-92.

On continuity and periodicity of measurable functions. *Ann. of Math.* (2) 41, 727-733 (1940). (Jeffery) 2-132.

On translations of functions and sets. *Bull. Amer. Math. Soc.* 46, 525-530 (1940). (Martin) 1-296.

On rearrangements of series. *Bull. Amer. Math. Soc.* 46, 797-799 (1940). (Kac) 2-89.

Some remarks on a paper entitled "General Tauberian theorems." *J. London Math. Soc.* 15, 242-246 (1940). (Levinson) 2-279.

On kernels of faltung transformations. *Trans. Amer. Math. Soc.* 48, 1-20 (1940). (Hille) 1-331.

On methods of summability and mass functions determined by hypergeometric coefficients. *Amer. J. Math.* 63, 705-708 (1941). (Garabedian) 3-149.

Tauberian conditions. *Ann. of Math.* (2) 42, 293-308 (1941). (Levinson) 2-191.

Limits of integrals. *Duke Math. J.* 9, 10-19 (1942). (Garabedian) 3-233.

On Hurwitz-Silverman-Hausdorff methods of summability. *Tōhoku Math. J.* 49, 1-14 (1942). (Hill) 7-433.

Analytic extension by Hausdorff methods. *Trans. Amer. Math. Soc.* 52, 217-237 (1942). (Garabedian) 4-81.

Euler transformations. *Amer. J. Math.* 66, 313-338 (1944). (Garabedian) 6-46.

On sequences with vanishing even or odd differences. *Amer. J. Math.* 66, 339-340 (1944). (Szegő) 6-46.

Summability of subsequences. *Bull. Amer. Math. Soc.* 50, 596-598 (1944). (Garabedian) 6-46.

Criteria for completeness of orthonormal sets and summability of Fourier series. *Duke Math. J.* 11, 801-821 (1944). (Fort) 6-172.

Spans in Lebesgue and uniform spaces of translations of peak functions. *Amer. J. Math.* 67, 431-436 (1945). (Bochner) 7-61.

Convergence fields of methods of summability. *Ann. of Math.* (2) 46, 93-101 (1945). (Fort) 6-150.

A genesis for Cesàro methods. *Bull. Amer. Math. Soc.* 51, 90-94 (1945). (Fort) 6-150.

Spans in Lebesgue and uniform spaces of translations of step functions. *Bull. Amer. Math. Soc.* 51, 229-233 (1945). (Bochner) 6-267.

Abel transforms of Tauberian series. *Duke Math. J.* 12, 27-36 (1945). (Bosquet) 7-12.

On cores of bounded divergent complex sequences and of their transforms by square matrices. *Revista Ci., Lima* 47, 87-103 (1945). (Hill) 7-12.

Summability of power series. *Amer. Math. Monthly* 53, 251-259 (1946). (Hill) 7-433.

A simple sufficient condition that a method of summability be stronger than convergence. *Bull. Amer. Math. Soc.* 52, 128-132 (1946). (Moskowitz) 7-292.

Tauberian theorems for Nörlund summability. *Univ. Nac. La Plata. Publ. Fac. Ci. Fisicomat.* No. 188, Vol. 3, num. 5. Serie segunda, 15, *Revista*, 517-520 (1946). (Pitt) 8-147.

A simple and natural notation for the theory of summability of series and sequences. *Univ. Nac. Tucumán. Revista A.* 5, 195-202 (1946). (Buck) 8-510.

Subseries of series which are not absolutely convergent. *Bull. Amer. Math. Soc.* 53, 118-120 (1947). (Rogosinski) 8-456.

Methods of summability which evaluate sequences of zeros and ones summable C_1 . *Amer. J. Math.* 70, 75-81 (1948). (Piranian) 10-245.

Abel transforms and partial sums of Tauberian series. *Ann. of Math.* (2) 50, 110-117 (1949). (Hartman) 10-291.

Ratio tests for convergence of series. *Pacific J. Math.* 1, 1-3 (1951). (Frink) 13-226.

Mean values and Frullani integrals. *Proc. Amer. Math. Soc.* 2, 237-241 (1951). (Jeffery) 13-18.

Arithmetic means and the Tauberian constant. *Acta Math.* 87, 347-359 (1952). 14-463.

Rogosinski-Bernstein trigonometric summability methods and modified arithmetic means. *Ann. of Math.* (2) 56, 537-559 (1952). (Lorentz) 14-368.

Inclusion relations among methods of summability compounded from given matrix methods. *Ark. Mat.* 2, 361-374 (1952). (Hill, J. D.) 14-551.

Approximation by use of kernels originating from Abel transforms of series. *Comment. Math. Helv.* 26, 171-179 (1952). (Lorentz) 14-464.

Abel transforms of Tauberian series and analytic approximation to curves and functions. *Duke Math. J.* 19, 131-138 (1952). (Hartman) 13-738.

Equivalence of methods for evaluation of sequences. *Proc. Amer. Math. Soc.* 3, 550-556 (1952). (Lorentz) 14-39.

Arithmetic means of some Tauberian series and determination of a lower bound for a fundamental Tauberian constant. *Proc. London Math. Soc.* (3) 2, 369-384 (1952). (Lorentz) 14-160.

Integral transformations and Tauberian constants. *Trans. Amer. Math. Soc.* 72, 501-518 (1952). (Lorentz) 13-934.

Tauberian series and their Abel power series transforms. *Ann. Soc. Polon. Math.* 25 (1952), 218-230 (1953). (Zamansky) 15-26.

Frullani integrals and variants of the Egoroff theorem on essentially uniform convergence. *Acad. Serbe Sci. Publ. Inst. Math.* 6, 12-16 (1954). (Jeffery) 16-456.

Mercer's summability theorem. *J. London Math. Soc.* 29, 123-125 (1954). (Lorentz) 15-305.

Abel and Riesz transforms of series having bounded partial sums. *J. Rational Mech. Anal.* 3, 47-72 (1954). (Lorentz) 15-416.

Tauberian relations among partial sums, Riesz transforms, and Abel transforms of series. *J. Reine Angew. Math.* 193, 94-118 (1954). (Lorentz) 16-237.

Global versions of the central limit theorem. *Proc. Nat. Acad. Sci. U.S.A.* 40, 800-804 (1954). (Kendall) 16-268.

Abel and Riesz transforms of general Tauberian series. *Rend. Circ. Mat. Palermo* (2) 3 (1954), 293-336 (1955). (D. Gaier) 16-918.

Equiconvergence of Cesàro and Riesz transforms of series. *Duke Math. J.* 22, 451-460 (1955). (D. Gaier) 17-146.

Permutations preserving convergence of series. *Proc. Amer. Math. Soc.* 6, 563-564 (1955). (V. L. Klee) 17-146.

Estimates for global central limit theorems. *Ann. Math. Statist.* 28 (1957), 26-42. (R. L. Anderson) 18-832.

Borel transforms of Tauberian series. *Math. Z.* 67 (1957), 51-62. (J. Korevaar) 18-732.

The Lototsky method for evaluation of series. *Michigan Math. J.* 4 (1957), 105-128. (A. Peyerimhoff) 19-1174.

Densities of sets of integers and transforms of sequences of zeros and ones. *Trans. Amer. Math. Soc.* 85 (1957), 369-389. (A. Dvoretzky) 19-543.

---- and Hill, J. D.

Summability of bounded sequences. *Duke Math. J.* 11, 573-574 (1944). (Garabedian) 6-46.

A trigonometric infinite product. *Amer. Math. Monthly* 54, 206-211 (1947). (Gage) 9-28.

Agnola, Carlo Alberto Dell'. See Dell'Agnola, Carlo Alberto.

Agodi, Attilio.

Un metodo per il calcolo approssimato degli autovalori relativi ad un particolare sistema di Sturm-Liouville. *Boll. Accad. Gioenia Sci. Nat. Catania* (4) no. 8, 487-497 (1951). (Funk) 14-414.

Agostinelli, Cataldo.

Sul moto di un corpuscolo elettrizzato in un campo magnetico simmetrico rispetto a un asse e integrazione del problema in un caso particolare. *Atti Accad. Sci. Torino* 74, 69-85 (1939). (M. C. Gray) 1-92.

Sul moto di un corpuscolo elettrizzato in presenza di un dipolo magnetico e in prossimità del piano equatoriale. *Ist. Lombardo, Rend.* 72, 285-300 (1939). (M. C. Gray) 1-93.

Sui problemi fondamentali della cosmogonia. *Atti Accad. Italia, Rend. Cl. Sci. Fis. Mat. Nat.* (7) 2, 166-186 (1940). (Kaplan) 8-410.

Moto di due corpi rigidi collegati in un punto e di cui uno ha un punto fisso. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 75, 249-263 (1940). (Gray) 3-21.

Moto di due corpi rigidi pesanti collegati in un punto e di cui uno ha un punto fisso. *Ist. Lombardo Sci. Lett. Cl. Sci. Mat. Nat. Rend.* (3) 4(73), 663-678 (1940). (Lewis) 8-538.

Sulla magnetizzazione di un cilindro di lunghezza finita in presenza di un campo magnetico qualsiasi. *Ann. Mat. Pura Appl.* (4) 20, 221-255 (1941). (Gray) 3-93.

Effetto del termine cosmogonico sullo spostamento perielio di una orbita planetaria e sulla variazione del parametro e dell'eccentricità. *Atti Accad. Italia, Rend. Cl. Sci. Fis. Mat. Nat.* (7) 2, 592-602 (1941). (Kaplan) 8-410.

Sul moto per sola gravitazione di un mezzo continuo disgregato. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 76, 3-20 (1941). (Gray) 3-93.

Vortice cilindrico in un fluido viscoso. *Boll. Un. Mat. Ital.* (2) 3, 283-286 (1941). (Liepmann) 3-93.

Sulla trasformazione delle equazioni della dinamica. *Ann. Mat. Pura Appl.* (4) 21, 39-109 (1942). (MacColl) 6-24.

Sulla variazione dell'inclinazione del piano dell'orbita, del parametro e dell'eccentricità nel moto relativo di un pianeta puntiforme attratto colla legge di Armellini da un sole esteso e rotante. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 77, 30-46 (1942). (Kaplan) 7-494.

Sulla variazione dell'ora terrestre. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 77, 130-153 (1942). (Kaplan) 7-494.

Vibrazioni e pressioni critiche in una piastra circolare sollecitata al contorno da una pressione radiale. *Atti Secondo Congresso Un. Mat. Ital., Bologna, 1940*, pp. 360-370. Edizioni Cremonense, Rome, 1942. 8-421.

Nuovo procedimento di integrazione per serie delle equazioni del moto di un corpuscolo elettrizzato in presenza di un dipolo magnetico. *Atti Secondo Congresso Un. Mat. Ital., Bologna, 1940*, pp. 371-381. Edizioni Cremonense, Rome, 1942. 8-424.

Sopra alcuni integrali delle funzioni cilindriche. *Boll. Un. Mat. Ital.* (2) 4, 25-28 (1942). (Erdélyi) 7-441.

Applicazione del metodo delle immagini alla determinazione del moto liquido piano in una corona circolare in cui si formino dei vortici puntiformi. *Problemi elettrostatici corrispondenti. Ist. Lombardo Sci. Lett. Cl. Sci. Mat. Nat. Rend.* (3) 6(75), 669-689 (1942). 8-294.

Sul moto asintotico degli $n+1$ corpi. *Mem. Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* (2) 70, 79-126 (1942). (Kaplan) 8-606.

Su di una proprietà del momento magnetico di una sfera. *Boll. Un. Mat. Ital.* (2) 5, 1-5 (1943). 7-302.

Equilibrio relativo di uno strato liquido omogeneo su di una Sfera rigida rotante uniformemente. *Boll. Un. Mat. Ital.* (2) 5, 227-233 (1943). 8-291.

Sul problema delle aurore polari (moto di un corpuscolo elettrizzato in presenza di una sfera magnetica). *Soluzioni stazionarie. Pont. Acad. Sci. Comment.* 7, 399-414 (1943). (Gray) 10-343.

Nuovi contributi alla teoria degli anelli di Saturno. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 79, 346-370 (1944). (Kaplan) 7-494.

Sulla variazione delle velocità angolare terrestre durante una lunazione. *Ist. Lombardo Sci. Lett. Cl. Sci. Mat. Nat. Rend.* (3) 8(77), 527-547 (1944) 8-291.

Sull'esistenza di integrali di un sistema anolonomo con

coordinate ignorabili. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 80, 231-239 (1945). (Kaplan) 9-111.

Sull'area delle orbite cometarie. *Atti Soc. Nat. Mat. Modena* (6) 76, 64-67 (1945). (Kaplan) 8-495.

Sui problemi dinamici con forze funzioni lineari delle velocità, per i quali esiste la funzione lagrangiana. I. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 1, 182-186 (1946). (Lewis) 8-538.

Sui problemi dinamici con forze funzioni lineari delle velocità per i quali esiste la funzione lagrangiana. II. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 1, 364-368 (1946). (Lewis) 8-538.

Sul problema di Cauchy per l'equazione differenziale delle piastre vibranti. *Ann. Mat. Pura Appl.* (4) 26, 27-41 (1947). (Dressel) 10-124.

Interpretazione elettrodinamica della legge di attrazione universale e nuova spiegazione dello spostamento del perielio di Mercurio. *Atti Sem. Mat. Fis. Univ. Modena* 1, 148-164 (1947). 10-487.

Sulla integrazione dell'equazione integro-differenziale che regge il fenomeno della diffusione dei neutroni termici. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 5, 140-143 (1948). (Chandrasekhar, S.) 10-716.

Sistemi anolonomi a caratteristiche cinetiche separate e moto di rotolamento di una sfera pesante sopra una superficie generica. *Atti Sem. Mat. Fis. Univ. Modena* 2, 197-213 (1948). (Leimanis) 10-633.

Sul moto intorno a un punto fisso di un corpo rigido pesante il cui baricentro appartiene all'asse di uno dei piani ciclici dell'ellissoide d'inerzia. *Ann. Mat. Pura Appl.* (4) 30, 211-224 (1949). (Lewis) 11-747.

Sull'applicabilità del metodo di Jacobi della meccanica analitica ai sistemi anolonomi. I. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 7, 93-95 (1949). (Lewis) 11-550.

Sull'applicabilità del metodo di Jacobi della meccanica analitica ai sistemi anolonomi. II. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 7, 96-99 (1949). (Lewis) 11-550.

Sul moto di un corpo rigido pesante asimmetrico col baricentro appartenente all'asse di uno dei piani ciclici dell'ellissoide d'inerzia. *Atti Sem. Mat. Fis. Univ. Modena* 3, 248-260 (1949). (Lewis) 11-550.

Le equazioni canoniche del moto di un sistema anolonomo come sistema associato a un determinato pfaffiano. *Boll. Un. Mat. Ital.* (3) 4, 345-348 (1949). (Leimanis) 11-550.

Sullo spostamento dei perielii dei pianeti. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 8, 21-31 (1949). 11-407.

Sulla variazione degli elementi ellittici dell'orbita di un pianeta attratto dal sole con una legge analoga a quella di Weber. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 8, 167-189 (1949). (Langebartel) 11-407.

Sulla stabilità di un particolare moto di precessione regolare di un solido pesante asimmetrico. *Ist. Veneto Sci. Lett. Arti. Parte II. Cl. Sci. Mat. Nat.* 107, 193-203 (1949). (Lewis) 11-747.

Sulla determinazione degli autovalori nel problema delle vibrazioni di una membrana con contorno epicicloideale fisso. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 7 (1949), 316-320 (1950). (Erdélyi) 11-440.

Effetti sulla rotazione della Terra di una legge di attrazione analoga a quella di Weber. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 84, 48-62 (1950). (Langebartel) 13-167.

Sul problema dei tre corpi. *Matematiche, Catania* 5, 45-65 (1950). 12-449.

Nuovi contributi alla teoria della figura dei pianeti. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 9, 179-224 (1950). (Jardetzky) 12-753.

Sulle funzioni epicicloideali e alcune nuove relazioni fra le funzioni di Bessel. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 11, 339-344 (1951). (Erdélyi) 13-843.

Sulla propagazione di onde elettromagnetiche in un tubo conduttore riempito di dielettrico eterogeneo. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 85, 331-347 (1951). (Gray) 14-433.

Configurazioni di equilibrio di una massa liquida omogenea attratta da più centri lontani con la legge di Newton. *Mem. Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* (2) 71, 1-48 (1951). (Jardetzky) 14-94.

Sul problema dei tre corpi. *Rend. Sem. Mat. Fis. Milano* 21 (1950), 165-195 (1951). 13-698.

Vibrazioni elettromagnetiche in una cavità riempita di dielettrico eterogeneo. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 10, 175-210 (1951). (Gray) 14-115.

Sulle funzioni epicicloidi e loro applicazione ad alcuni problemi di fisica matematica. *Ann. Mat. Pura Appl.* (4) 33, 165-210 (1952). (Erdélyi) 14-373.

Sulla risoluzione mediante integrali definiti del problema delle vibrazioni di una piastra. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 13, 396-400 (1952). (Dressel) 14-1147.

Onde elettromagnetiche stazionarie in una cavità ellissoidale a tre assi con involucro metallico perfettamente conduttore. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 86, 85-99 (1952). (Papap) 15-487.

Nuove funzioni per la risoluzione dei problemi ai limiti relativi al campo ellittico senza fare uso delle trascendenti di Mathieu. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 86, 180-194 (1952). (Erdélyi) 15-424.

Sopra due casi notevoli di integrabilità delle equazioni della propagazione di onde elettromagnetiche in un tubo cilindrico circolare con dielettrico eterogeneo. *Boll. Un. Mat. Ital.* (3) 7, 267-272 (1952). (Papap) 14-518.

Sul moto di rotolamento su un piano orizzontale di una sfera pesante a struttura giroscopica rispetto a un diametro. *Revista Mat. Univ. Parma* 3, 327-338 (1952). (MacColl) 14-1024.

Sulla propagazione di onde elettromagnetiche guidate entro tubi cilindrici. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 11, 121-147 (1952). (Saunders) 15-271.

Sopra un caso del problema ristretto dei tre corpi più generale di quello di Hill. *Boll. Un. Mat. Ital.* (3) 8, 377-384 (1953). (Lewis) 15-749.

Figure di equilibrio prossime all'ellissoide di una massa liquida omogenea attratta da più corpi lontani con la legge di Newton. *Rend. Circ. Mat. Palermo* (2) 1 (1952), 281-322 (1953). (Jardetzky) 14-1131.

Soluzioni stazionarie delle equazioni della magneto idrodinamica interessanti la Cosmogonia. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 17, 216-221 (1954). (S. Chandrasekhar) 17-542.

Sui sistemi canonici che ammettono particolari classi di soluzioni stazionarie. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 88, 121-126 (1954). (Lewis) 17-203.

Sull'esistenza di soluzioni periodiche nel problema ristretto dei tre corpi. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 88, 265-291 (1954). (Lewis) 17-198.

Sistemi di equazioni differenziali normali del I ordine che ammettono speciali relazioni invarianti e che interessano il movimento di sistemi anonomi. *Boll. Un. Mat. Ital.* (3) 9, 136-141 (1954). (Lewis) 16-472.

Su una soluzione periodica del problema ristretto dei tre corpi più generale di quella di Hill. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 13, 131-151 (1954). (Lewis) 17-418.

Carlo Somigliana e la sua opera scientifica. *Univ. e Politec. Torino. Rend. Sem. Mat.* 14 (1954-55), 5-30. (1 plate) 17-698.

Onde elettromagnetiche guidate entro un tubo cilindrico percorso da un fluido dielettrico in moto traslatorio uniforme. *Univ. e Politec. Torino. Rend. Sem. Mat.* 14 (1954-55), 257-268. (E. T. Copson) 17-808.

Oscillazioni magneto idrodinamiche in una massa fluida rotante di dimensioni cosmiche, di forma ellissoidale rotonda. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 89, 41-58 (1955). (S. Chandrasekhar) 17-543.

Oscillazioni magneto idrodinamiche in una massa fluida cosmica uniformemente rotante dotata di un campo magnetico assiale e di un campo magnetico equatoriale rotante. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 89, 68-92 (1955). (S. Chandrasekhar) 17-543.

Sulla compatibilità di una forma ellissoidale a tre assi per una massa fluida cosmica rotante, elettricamente conduttrice, immersa in un campo magnetico uniforme. *Boll. Un. Mat. Ital.* (3) 10, 17-23 (1955). (S. Chandrasekhar) 17-674.

Magneto-idrodinamica cosmica. *Confer. Sem. Mat. Univ. Bari* no. 8, 16 pp. (1955). 17-95.

Su alcuni moti magneto idrodinamici in una massa fluida cilindrica rotante interessanti la Cosmogonia. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 90 (1955-56), 479-508. (E. T. Copson) 18-849.

Onde magneto idrodinamiche in una massa fluida incompressibile cilindrica circolare indefinita. *Univ. e Politec. Torino. Rend. Sem. Mat.* 15 (1955-56), 107-120. (E. T. Copson) 18-699.

Piccoli movimenti in una massa gassosa stellare in evoluzione adiabatica. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 20 (1956), 212-217. (L. Jacchia) 18-364.

Piccoli movimenti in una massa gassosa stellare in equilibrio radiativo. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 20 (1956), 347-352. 19-1240.

Nuova forma sintetica delle equazioni del moto di un sistema anonomo ed esistenza di un integrale lineare nelle velocità lagrangiane. *Boll. Un. Mat. Ital.* (3) 11 (1956), 1-9. (D. C. Lewis) 17-1246.

Oscillazioni magneto-idrodinamiche in una massa fluida ellissoidale rotante. Influenza della viscosità. *J. Math. Pures Appl.* (9) 35 (1956), 7-17. (E. T. Copson) 17-904.

Moti magneto idrodinamici simmetrici rispetto a un asse. Caso delle piccole oscillazioni in una massa fluida sferoidale. *Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat.* 91 (1956-57), 263-298. (S. Chandrasekhar) 19-1226.

Su alcuni moti magneto idrodinamici ai quali è applicabile la teoria di Helmholtz sui vortici. *Univ. e Politec. Torino. Rend. Sem. Mat.* 16 (1956-57), 393-412. (C. D. Calsoyas) 20 #1514.

Turbolenza in magneto idrodinamica. Corso sulla teoria della turbolenza, Vol. 1, pp. 289-335. Centro Internazionale di Matematica Estivo. Libreria Editrice Universitaria Levrotto e Bella, Turin, 1957. viii + 339 pp. (H. Cabannes) 20 #620.

Figure di equilibrio ellissoidali per una massa fluida elettricamente conduttrice uniformemente rotante, con campi magnetici variabili col tempo. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 23 (1957), 469-414. (J. Naze) 20 #6919.

Sui vortici sferici in magneto idrodinamica. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 24 (1958), 35-42. (J. Naze) 20 #6918.

Agostini, Amedeo.

I baricentri di gravi non omogenei e la formola generale per il loro calcolo determinati da Bonaventura Cavalieri. *Boll. Un. Mat. Ital.* (2) 2, 147-171 (1940). 2-114.

Sopra gli abachi ad allineamento. *Boll. Un. Mat. Ital.* (2) 2, 360-363 (1940). 2-62.

Rileggendo la "Geometria speciosa" di Pietro Mengoli. *Period. Mat.* (4) 20, 313-327 (1940). (Neugebauer, O.) 3-97.

Le serie sommate da Pietro Mengoli. *Boll. Un. Mat. Ital.* (2) 3, 231-251 (1941). 3-97.

La geometria degli infinitesimi di Gerolamo Saladini. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 886-894. Edizioni Cremonense, Rome, 1942. 8-497.

L'uso delle lettere nel "Liber abaci" di Leonardo Fibonacci. *Boll. Un. Mat. Ital.* (3) 4, 282-287 (1949). 11-572.

L'opera matematica di Pietro Mengoli. *Arch. Internat. Hist. Sci. (N.S.)* 3, 816-834 (1950). 12-311.

L'opera matematica di Pietro Mengoli. *Archimede* 2, 165-170 (1950). 12-311.

Il metodo delle tangenti fondato sopra la dottrina dei moti nelle opere di Torricelli. *Period. Mat.* (4) 28, 141-158 (1950). 12-383.

Il contributo italiano al sorgere dell'analisi infinitesimale. *Archimede* 3, 168-173 (1951). 13-1.

I baricentri trovati da Torricelli. *Boll. Un. Mat. Ital.* (3) 6, 149-159 (1951). 13-2.

An inductive proof of Descartes' rule of signs. *Amer. Math. Monthly* 50, 178-180 (1943). 4-195.

Quasigroups. I. *Trans. Amer. Math. Soc.* 54, 507-519 (1943). (Ore) 5-229.

Algebras derived by non-associative matrix multiplication. *Amer. J. Math.* 66, 30-40 (1944). (Brauer, R.) 5-227.

Quasiquaternion algebras. *Ann. of Math. (2)* 45, 623-638 (1944). (Brauer, R.) 6-115.

Two element generation of a separable algebra. *Bull. Amer. Math. Soc.* 50, 786-788 (1944). (Ore) 6-115.

The matrices of factor analysis. *Proc. Nat. Acad. Sci. U. S. A.* 30, 90-95 (1944). (Mann) 5-209.

The minimum rank of a correlation matrix. *Proc. Nat. Acad. Sci. U. S. A.* 30, 144-146 (1944). (Mann) 6-6.

Quasigroups. II. *Trans. Amer. Math. Soc.* 55, 401-419 (1944). (Ore) 6-42.

On Jordan algebras of linear transformations. *Trans. Amer. Math. Soc.* 59, 524-555 (1946). (Brauer, R.) 8-63.

The Wedderburn principal theorem for Jordan algebras. *Ann. of Math. (2)* 48, 1-7 (1947). (R. Brauer) 8-435.

Absolute valued real algebras. *Ann. of Math. (2)* 48, 495-501 (1947). (Levitzki) 8-561.

A structure theory for Jordan algebras. *Ann. of Math. (2)* 48, 546-567 (1947). (Brauer, R.) 9-77.

On the power-associativity of rings. *Summa Brasil. Math.* 2, no. 2, 21-32 (1948). (Rees) 10-97.

Power-associative rings. *Trans. Amer. Math. Soc.* 64, 552-593 (1948). (Rees) 10-349.

On right alternative algebras. *Ann. of Math. (2)* 50, 318-328 (1949). (Schafer) 10-503.

Absolute-valued algebraic algebras. *Bull. Amer. Math. Soc.* 55, 763-768 (1949). (Schafer, R. D.) 11-76.

A note of correction. *Bull. Amer. Math. Soc.* 55, 1191 (1949). (Schafer) 11-76.

Almost alternative algebras. *Portugaliae Math.* 8, 23-36 (1949). (Schafer) 11-316.

A theory of trace-admissible algebras. *Proc. Nat. Acad. Sci. U. S. A.* 35, 317-322 (1949). (Schafer, R. D.) 11-6.

A note on the exceptional Jordan algebra. *Proc. Nat. Acad. Sci. U. S. A.* 36, 372-374 (1950). (McCoy) 12-5.

A theory of power-associative commutative algebras. *Trans. Amer. Math. Soc.* 69, 503-527 (1950). (Rees) 12-475.

New simple power-associative algebras. *Summa Brasil. Math.* 2, 183-194 (1951). (Rees) 14-11.

Power-associative algebras. *Proceedings of the International Congress of Mathematicians, Cambridge, Mass., 1950, vol. 2*, pp. 25-32. *Amer. Math. Soc.*, Providence, R. I., 1952. (Dieudonné) 13-527.

On simple alternative rings. *Canadian J. Math.* 4, 129-135 (1952). (Hall, Marshall) 14-11.

On nonassociative division algebras. *Trans. Amer. Math. Soc.* 72, 296-309 (1952). (Rees) 13-816.

Rational normal matrices satisfying the incidence equation. *Proc. Amer. Math. Soc.* 4, 554-559 (1953). (Hall, Marshall) 15-94.

On commutative power-associative algebras of degree two. *Trans. Amer. Math. Soc.* 74, 323-343 (1953). (Schafer) 14-614.

The structure of right alternative algebras. *Ann. of Math. (2)* 59, 408-417 (1954). (Schafer) 15-774.

Leonard Eugene Dickson, 1874-1954. *Bull. Amer. Math. Soc.* 61, 331-345 (1955). 17-2.

On involutorial algebras. *Proc. Nat. Acad. Sci. U. S. A.* 41, 480-482 (1955). (R. D. Schafer) 17-9.

On Hermitian operators over the Cayley algebra. *Proc. Nat. Acad. Sci. U. S. A.* 41, 639-640 (1955). (R. D. Schafer) 17-123.

A property of special Jordan algebras. *Proc. Nat. Acad. Sci. U. S. A.* 42 (1956), 624-625. (I. Kaplansky) 18-375.

On certain trinomial equations in finite fields. *Ann. of Math. (2)* 66 (1957), 170-178. (Shen Lin) 19-394.

A property of ordered rings. *Proc. Amer. Math. Soc.* 8 (1957), 128-129. (M. Henriksen) 18-557.

The norm form of a rational division algebra. *Proc. Nat. Acad. Sci. U. S. A.* 43 (1957), 506-509. (W. E. Deskins) 19-246.

On partially stable algebras. *Trans. Amer. Math. Soc.* 84 (1957), 430-443. (R. D. Schafer) 19-1156.

Fundamental concepts of higher algebra. The University of Chicago Press, Chicago, Ill., 1958. ix + 165 pp. (O. Ore) 20 #5190.

A construction of exceptional Jordan division algebras. *Ann. of Math. (2)* 67 (1958), 1-28. (B. Harris) 19-1036.

On the orthogonal equivalence of sets of real symmetric matrices. *J. Math. Mech.* 7 (1958), 219-235. (H. S. A. Potter) 19-1153.

Addendum to the paper on partially stable algebras. *Trans. Amer. Math. Soc.* 87 (1958), 57-62. (R. D. Schafer) 19-1157. --- and Frank, M. S.

Simple Lie algebras of characteristic p. *Univ. e Politec. Torino. Rend. Sem. Mat.* 14 (1954-55), 117-139. (W. G. Lister) 18-52.

Additive set-functions in abstract spaces. Rec. Math. [Mat. Sbornik] N.S. 13 (55), 169-238 (1943). (English. Russian summary) (Wallman) 6-275.

The inner metric of a convex surface in a space of constant curvature. C. R. (Doklady) Acad. Sci. URSS (N.S.) 45, 3-6 (1944). (Brown) 7-167.

Complete convex surfaces in Lobachevskian space. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 9, 113-120 (1945). (Russian. English summary) (Brown) 7-167.

Isoperimetric inequalities for curved surfaces. C. R. (Doklady) Acad. Sci. URSS (N.S.) 47, 235-238 (1945). (Busemann) 7-167.

Curves on convex surfaces. C. R. (Doklady) Acad. Sci. URSS (N.S.) 47, 315-317 (1945). (Busemann) 7-167.

An isoperimetric problem. Doklady Akad. Nauk SSSR (N.S.) 50, 31-34 (1945). (Russian) (Busemann) 14-577.

On triangles on convex surfaces. Doklady Akad. Nauk SSSR (N.S.) 50, 19-22 (1945). (Russian) (Busemann) 14-577.

Curvature of convex surfaces. Doklady Akad. Nauk SSSR (N.S.) 50, 23-26 (1945). (Russian) (Busemann) 14-577.

Convex surfaces as surfaces of positive curvature. Doklady Akad. Nauk SSSR (N.S.) 50, 27-30 (1945). (Russian) (Busemann) 14-577.

On the metric of a convex surface in a space of constant curvature. C. R. (Doklady) Acad. Sci. URSS (N.S.) 51, 411-413 (1946). (Busemann) 8-169.

On the gluing of convex surfaces. C. R. (Doklady) Acad. Sci. URSS (N.S.) 54, 99-101 (1946). (Busemann) 8-484.

The method of gluing in the theory of surfaces. Doklady Akad. Nauk SSSR (N.S.) 57, 863-865 (1947). (Russian) (Busemann) 9-302.

On the work of S. E. Cohn-Vossen. Uspehi Matem. Nauk (N.S.) 2, no. 3 (19), 107-141 (1947). (Russian) 9-485.

Geometry and topology in the Soviet Union. I. Uspehi Matem. Nauk (N.S.) 2, no. 4 (20), 3-58 (1947). (Russian) 10-261.

Geometry and topology in the Soviet Union. II. Uspehi Matem. Nauk (N.S.) 2, no. 5 (21), 9-92 (1947). (Russian) 10-261.

Vnutrennyaya Geometriya Vypuklykh Poverkhnostei. [Intrinsic Geometry of Convex Surfaces]. OGIz, Moscow-Leningrad, 1948. 387 pp. (Busemann) 10-619.

Foundations of the inner geometry of surfaces. Doklady Akad. Nauk SSSR (N.S.) 60, 1483-1486 (1948). (Russian) (Busemann) 10-147.

Curves on manifolds of bounded curvature. Doklady Akad. Nauk SSSR (N.S.) 63, 349-352 (1948). (Russian) (Busemann) 10-325.

Quasigeodesics. Doklady Akad. Nauk SSSR (N.S.) 69, 717-720 (1949). (Russian) (Busemann) 11-680.

On surfaces represented as the difference of convex functions. Izvestiya Akad. Nauk Kazah. SSR, 60, Ser. Mat. Meh. 3, 3-20 (1949). (Russian. Kazak summary) (Busemann) 13-971.

Vypuklye mnogogranniki. [Convex Polyhedra]. Gosudarstv. Izdat. Tehn.-Teor. Lit., Moscow-Leningrad, 1950. 428 pp. (Busemann) 12-732.

Quasigeodesics on manifolds which are homeomorphic to a sphere. Doklady Akad. Nauk SSSR (N.S.) 70, 557-560 (1950). (Russian) (Busemann) 11-539.

Surfaces represented by the differences of convex functions. Doklady Akad. Nauk SSSR (N.S.) 72, 613-616 (1950). (Russian) (Busemann) 12-853.

On certain questions of scientific work and the education of mathematicians. Vestnik Leningrad. Univ. 1950, no. 1, 3-20 (1950). (Russian) 13-98.

The dialectics of Lenin and mathematics. Vestnik Leningrad. Univ. 1950, no. 4, 24-30 (1950). (Russian) 13-98.

Lenin's dialectics and mathematics. Časopis Pěst. Mat. 76, 237-250 (1951). (Czech) 14-234.

On idealism in mathematics. Časopis Pěst. Mat. 76, 251-270 (1951). (Czech) 14-234.

A theorem on triangles in a metric space and some of its applications. Trudy Mat. Inst. Steklov., v. 38, pp. 5-23. Izdat. Akad. Nauk SSSR, Moscow, 1951. (Russian) (Busemann) 14-198.

On Einstein's paradox in quantum mechanics. Doklady Akad. Nauk SSSR. (N.S.) 84, 253-256 (1952). (Russian) (Rosen) 14-435.

On the meaning of wave function. Doklady Akad. Nauk SSSR (N.S.) 85, 291-294 (1952). (Russian) (Rosen) 14-435.

Synthetic methods in the theory of surfaces. Convegno Internazionale di Geometria Differenziale, Italia, 1953, pp. 162-175. Edizioni Cremonese, Roma, 1954. (Busemann) 16-162.

On completion of a space by polyhedra. Vestnik Leningrad. Univ. Ser. Mat. Fiz. Him. 9 (1954), no. 2, 33-43. (Russian) 20 #1301.

Some theorems on partial differential equations of the second order. Vestnik Leningrad. Univ. 9 (1954), no. 8, 3-17. (Russian) (H. Busemann) 17-493.

Some theorems on partial differential equations of second order. Vestnik Leningrad. Univ. Ser. Mat. Fiz. Him. 9 (1954), no. 8, 3-17. (Russian) 20 #1105.

Die innere Geometrie der konvexen Flächen. Akademie-Verlag, Berlin, 1955. xvii + 522 pp. 17-74.

What is geometry. Wiadom. Mat. (2) 1, 4-46 (1955). (Polish) 16-1044.

Geometry and topology in the Soviet Union. I. Acad. R. P. Romfne. An. Romfno-Soviet. Ser. Mat.-Fiz. (3) 10 (1956), no. 1 (16), 5-35. (Romanian) 17-931.

Geometry and topology in the Soviet Union. I. Acad. R. P. Romfne. An. Romfno-Soviet. Ser. Mat. Fiz. (3) 10 (1956), no. 2 (17), 5-28. (Romanian) 18-139.

Uniqueness theorems for surfaces in the large. I. Vestnik Leningrad. Univ. 11 (1956), no. 19, 5-17. (Russian) (H. Busemann) 19-167.

Über eine Verallgemeinerung der Riemannschen Geometrie. Schr. Forschungsinst. Math. 1 (1957), 33-84. (H. Busemann) 19-304.

Ruled surfaces in metric spaces. Vestnik Leningrad. Univ. 12 (1957), no. 1, 5-26, 207. (Russian. English summary) 19-59.

Konvexe polyeder. Mathematische Lehrbücher und Monographien. Herausgegeben von der Deutschen Akademie der Wissenschaften zu Berlin, Forschungsinstitut für Mathematik, II. Abteilung: Mathematische Monographien, Bd. VIII. Akademie-Verlag, Berlin, 1958. x + 419 pp. 19-1192.

Dirichlet's problem for the equation $\text{Det}||z_{ij}|| = \phi(z_1, \dots, z_n, z, x_1, \dots, x_n)$. I. Vestnik Leningrad. Univ. Ser. Mat. Meh. Astr. 13 (1958), no. 1, 5-24. (Russian. English summary) (H. Busemann) 20 #3385.

---- and Pogorelov, A. V.

Uniqueness of convex surfaces of revolution. Mat. Sbornik N.S. 26 (68), 183-204 (1950). (Russian) (Busemann) 11-680.

---- and Sen'kin, E. P.

On the rigidity of convex surfaces. Vestnik Leningrad. Univ. 10 (1955), no. 8, 3-13. (Russian) (H. Busemann) 17-295.

Supplement to the paper, "On the rigidity of convex surfaces." Vestnik Leningrad. Univ. 11 (1956), no. 1, 104-106. (Russian) (H. Busemann) 17-998.

---- and Strel'cov, V. V.

Estimates of the length of a curve on a surface. Doklady Akad. Nauk SSSR (N.S.) 93, 221-224 (1953). (Russian) (Busemann) 15-737.

Sulla convergenza delle serie ed i suoi caratteri gruppi (convergenza assoluta, incondizionata, totale). *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 9, 172-176 (1939). (Agnew) 8-456.

Sulla teoria della sostituzioni generalizzate e dei loro gruppi generalizzati. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 10, 115-127 (1940). (Mann) 8-439.

Statistica degli aggregati in una collettività e concentrazione rispetto a due caratteri. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 10, 160-172 (1940). (Feller) 8-523.

Schema statistico di evoluzione e di selezione in una collettività a monoidridismo mendeliano. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 10, 260-280 (1940). (Feller) 9-50.

Statistica di configurazioni. (Ricerche su coppie di variabili casuali in correlazione). *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 11, 150-158 (1941). (Feller) 8-523.

Elementi matematici di base per una teoria delle collettività secondo la genetica. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 12, 40-47 (1942). (Feller) 8-479.

Sull'equazione di Stiefel ed altre analoghe. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 12, 48-53 (1942). 8-210.

Equazioni algebriche nei corpi numerici. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 12, 234-244 (1942). (McCoy) 8-193.

Interpretazione probabilistica di teorie logiche e matematiche relative a fenomeni concreti. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 12, 245-250 (1942). 8-247.

Equazioni differenziali e funzioni metageometriche. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 12, 316-323 (1942). (van Veen) 8-270.

Il numero quale elemento classificatore (numeri sistemali). *Ricerca, Napoli* 1, no. 1, 15-22; nos. 2-3, 10-14 (1950). (Kurepa) 13-120.

Sulla geometria di certi insiemi perfetti piani, e su certi numeri non Archimedei. *Ricerca, Napoli* 1, no. 4, 17-23 (1950); 2, no. 1, 9-21 (1951). (Rosenthal) 13-542.

Osservazioni sugli insiemi perfetti lineari ed i sistemi di numerazione. *Ricerca, Napoli* 2, no. 2, 11-17 (1951). (Kurepa) 13-728.

Spazi algebrici proiettivi (su algebre di Boole). *Giorn. Mat. Battaglini* (5) 1 (81), 42-69 (1952). (Moufang) 15-56.

Funzioni simmetriche, involuzioni ed N-adi in un'algebra di Boole. *Giorn. Mat. Battaglini* (5) 1 (81), 181-198 (1953). (Whitman) 15-390.

Saggio matematico di leggi evolutive di collettività (non-determinismo, causalismo, finalismo). *Ricerca, Napoli* 2, no. 3-4, 3-9 (1951); 3, no. 1, 3-7, no. 2, 3-11, no. 3-4, 17-24 (1952); 4, no. 1-2, 11-39 (1953). (Lukacs) 15-42.

Preliminari topologici su gli alberi. *Giorn. Mat. Battaglini* (5) 2 (82), 237-266 (1 plate) (1954). (Whitman) 15-892.

Sul concetto di frequenza relativa: sue connessioni con certe serie di potenze e certe algebre di Boole. *Giorn. Mat. Battaglini* (5) 2 (82), 379-404 (1954). (Copeland) 16-838.

Su due sistemi di funzioni ortogonali costanti a tratti e collegati a determinanti di Hadamard. *Ricerca, Napoli* 5, no. 1-2, 3-14 (1954). (Favard) 16-126.

Operazioni binarie. Scale di operazioni. *Ricerca, Napoli* 5, no. 3, 3-11 (1954). (I. M. H. Etherington) 17-6.

Aritmetiche non peaniane, e loro relazioni coi numeri iterativi (coefficienti ed esponenti in un algoritmo). *Ricerca, Napoli* 5, no. 4, 3-12 (1954). (D. H. Lehmer) 17-232.

Algebre di Boole: Loro generalizzazione. *Reticoli. Matematiche, Catania* 9, 23-42 (1954). (Birkhoff) 16-895.

Geometrie riducibili non lineari di un semplice e geometria booleana di un ipercubo. *Giorn. Mat. Battaglini* (5) 3 (83), 13-40 (1955). (G. Birkhoff) 17-398.

Sistemi ortogonali di Walsh; matrici di Hadamard; trasformazioni di sistemi ortogonali. *Ricerca, Napoli* 6, no. 1, 3-17 (1955). (J. Favard) 17-478.

Automorfismi in un'algebra di Boole determinati da funzioni

algebriche e trascendenti invertibili e gruppo dell'ipercubo. *Ricerca*, Napoli 6 (1955), no. 2, 3-9; no. 3, 3-7. (G. Birkhoff) 18-275.

Geometrie booleane affini: calcolo matriciale e vettoriale su Algebre di Boole. *Giorn. Mat. Battaglini* (5) 3 (83) (1955), 137-156 (1956). (M. Novotný) 18-186.

Le algebre dei livelli quali estensioni delle algebre di Boole; loro riduzione a queste. *Giorn. Mat. Battaglini* (5) 4 (84) (1956), 150-188. (H. Gericke) 20 #3086.

Sulla polidromia di funzioni assegnate con espressioni aritmetiche e sul teorema di Volterra-Poincaré. *Ricerca*, Napoli 7 (1956), 32-42. (W. Saxer) 18-728.

Aspetto grupale e funzionale delle medie. *Giorn. Mat. Battaglini* (5) 5 (85) (1957), 12-30. (T. Viola) 19-990.

Medie e loro processi iterativi. *Giorn. Mat. Battaglini* (5) 5 (85) (1957), 52-79. (T. Viola) 19-990.

Struttura delle algebre di Boole e loro estensione quale calcolo delle classi (in senso ordinario oppure probabilistico). *Giorn. Mat. Battaglini* (5) 5 (85) (1957), 141-171. (D. Kurepa) 20 #4511.

Composizione relativistica di moti effettivi di particelle e di moti associati di de Broglie. *Ricerca*, Napoli (2) 8 (1957), Luglio-Dicembre, 3-7. 19-1237.

Andreotti, Aldo.

Le serie lineari sopra una retta multipla ed in particolare sopra una retta doppia. *Ann. Mat. Pura Appl.* (4) 27, 165-175 (1948). (Conforto) 11-615.

Questioni di equivalenza relative alle curve riducibili e ai punti base di un fascio di curve sopra una superficie algebrica. I. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 4, 551-557 (1948). (Conforto) 10-323.

Questioni di equivalenza relative alle curve riducibili e ai punti base di un fascio di curve sopra una superficie algebrica. II. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 4, 666-671 (1948). (Conforto) 10-323.

Sulle corrispondenze fra due curve birazionalmente distinte a moduli generali e sui modelli minimi dei loro prodotti. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 5, 375-380 (1948). (Conforto) 11-128.

Applicazione di un teorema di Schottky-Cecioni allo studio della geometria sopra una curva ellittica in relazione con quello sopra due curve ellittiche reali del tipo di Harnach. *Boll. Un. Mat. Ital.* (3) 3, 210-214 (1948). (Conforto) 11-206.

Sulle superficie di Kummer e di Weddle. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 6, 61-64 (1949). (Semple) 10-734.

Sulla proposizione di De Zolt pei poliedri. *Boll. Un. Mat. Ital.* (3) 4, 68-75 (1949). (Moufang) 11-124.

Sul risultante di due polinomi. *Boll. Un. Mat. Ital.* (3) 4, 168-169 (1949). (Thomas, J. M.) 11-153.

Un'applicazione di un teorema di Cecioni ad un problema di rappresentazione conforme. *Ann. Scuola Norm. Super. Pisa* (3) 2 (1948), 99-103 (1950). (Valiron) 11-507.

Sopra alcune superficie algebriche uniformizzabili. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 8, 569-570 (1950). (Muhly) 12-278.

Sopra le superficie algebriche che posseggono trasformazioni birazionali in sé. *Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl.* (5) 9, 255-279 (1950). (Todd, J. A.) 14-201, 1278.

Sopra le varietà di Picard d'una superficie algebrica e sulla classificazione delle superficie irregolari. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 10, 380-385 (1951). (Conforto) 13-866.

Sopra le involuzioni appartenenti ad una varietà di Picard. *Pont. Acad. Sci. Acta* 14 (1950), 107-115 (1951). (Italian. Latin summary) (Todd, J. A.) 13-378.

Sopra il problema dell'uniformizzazione per alcune classi di superficie algebriche. *Rend. Accad. Naz. dei XL* (4) 2, 111-127 (1951). (Dolbeault) 14-403.

Sopra le varietà di Picard di una superficie algebrica. *Rend. Accad. Naz. dei XL* (4) 2, 129-137 (1951). (Dolbeault) 14-404.

Les problèmes de classification dans la théorie des surfaces

algébriques irrégulières. *Deuxième Colloque de Géométrie Algébrique*, Liège, 1952, pp. 111-118. Georges Thone, Liège; Masson & Cie, Paris, 1952. (Abellanas) 14-790.

Una nuova interpretazione del sistema di Filolao, più consona ai testi e che giustifica i dieci corpi mobili, e che mostra come in tale sistema la rotazione diurna degli astri dovesse considerarsi reale. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 903-907. Edizioni Cremonense, Rome, 1942. 8-497.

Gli antichi sistemi geocentrici e la confusione che generalmente regna attorno ad essi nelle storie delle scienze e della filosofia. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 908-911. Edizioni Cremonense, Rome, 1942. 8-497.

Una nuova interpretazione di alcuni brani di Platone che esclude in Platone ogni ipotesi sulla reale rotazione diurna della terra. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 912-920. Edizioni Cremonense, Rome, 1942. 8-497.

Valore e funzioni dell'astronomia medievale italiana nello sviluppo storico dell'astronomia e confutazione delle denigrazioni degli storici d'oltralpe. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 921-931. Edizioni Cremonense, Rome, 1942. 8-497.

Andronov, A. A. (=Andronov)

I. A. Vyšnegradskii and his role in the creation of the theory of automatic regulation. *Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk* 1949, 805-818 (1949). (Russian) 11-574.
 ---- et Bautin, N.

Le mouvement d'un avion neutre piloté automatiquement et la théorie des transformations ponctuelles des surfaces. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 43, 189-193 (1944). (Kaplan) 6-194.

Stabilisation de route d'un avion neutre par autopilote ayant un servomoteur à vitesse constante et à zone d'insensibilité. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 46, 143-146 (1945). (Kaplan) 7-203.

Sur un cas dégénéré du problème général de régulation directe. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 46, 277-279 (1945). (Levinson) 7-118.

The theory of course stabilization of a neutral airplane by means of an autopilot with a constant-speed servomotor. I. Case of absence of a zone of insensitivity. *Izv. Akad. Nauk SSSR. Otd. Tehn. Nauk* 1955, no. 3, 3-32 (1955). (Russian) (H. P. Thielman) 17-154.

On the influence of Coulomb friction in the dashpot on processes of indirect regulation. *Izv. Akad. Nauk SSSR. Otd. Tehn. Nauk* 1955, no. 7, 34-48. (Russian) (S. Lefschetz) 17-265.
 ---- and Chaikin, C. E.

Theory of Oscillations. English Language Edition Edited Under the Direction of Solomon Lefschetz. Princeton University Press, Princeton, N. J., 1949. ix + 358 pp. (Levinson) 10-535.

---- and Leontovič, E. A.

Generation of limit cycles from a structurally unstable focus or from a center and from a structurally unstable limit cycle. *Dokl. Akad. Nauk SSSR (N. S.)* 99, 885-888 (1954). (Russian) (Lefschetz) 16-820.

The generation of limit cycles from a fine (multiple) focus or center, or from a fine (multiple) limit cycle. *Mat. Sb. N. S.* 40 (82) (1956), 179-224. (Russian) (J. L. Massera) 19-36.

---- and Maier, A. G.

The simplest linear systems with retardation. *Avtomatika i Telemekhanika* 7, 95-106 (1946). (Russian) (Bellman) 8-517.
 Vyšnegradskii's problem in the theory of direct regulation. I. The theory of the regulator of direct action in the presence of Coulomb and viscous friction. *Avtomatika i Telemekhanika* 8, 314-334 (1947). (Russian) (Golomb) 12-413.

---- et Mayer, A.

Le problème de Mises dans la théorie de la régulation directe et la théorie des transformations ponctuelles des surfaces. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 43, 54-58 (1944). (Levinson) 6-154.

Le problème de Wischnegradski dans la théorie de la régulation directe. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 47, 340-343 (1945). (Levinson) 7-300.

---- et Neumark, G.

Sur les mouvements des modèles idéalisés d'horloge ayant deux degrés de liberté. Horloge pré-galiléenne. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 51, 17-20 (1946). (Lewis) 8-101.

---- Bautin, N., et Gorelik, G.

Auto-oscillations d'un schéma simplifié contenant une hélice à pas variable automatique. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 47, 263-267 (1945). (Levinson) 7-300.

Andronov, I. K.

On the equicompositeness of the parallelepiped of E. S. Fedorov with equal volume. *Moskov. Oblast. Pedagog. Inst. Uč. Zap. Trudy Kafedr Mat.* 20 (1954), 125-132. (Russian) (H. Busemann) 17-883.

On approximations in resectioning according to the method of equicompositeness of polyhedra with equal volume. *Moskov. Oblast. Pedagog. Inst. Uč. Zap. Trudy Kafedr Mat.* 20 (1954), 133-137. (Russian) 17-884.

On necessary and sufficient conditions for equicompositeness of equivalent plane figures of zero genus. *Moskov. Oblast. Pedagog. Inst. Uč. Zap. Trudy Kafedr Mat.* 20 (1954), 138-144. (Russian) (H. Busemann) 17-884.

Results of forty years of development in mathematical education in the USSR. *Mat. v škole* 1957, no. 5, 6-21. (Russian) 19-520.

Andronow, A. A. See Andronov.

Andrunakievič, V. A. (Andrunakievitch, V.)

Semi-radical and radical rings. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 55, 3-5 (1947). (Dieudonné) 8-560.

Semi-radical rings. *Izvestiya Akad. Nauk SSSR. Ser. Mat.* 12, 129-178 (1948). (Russian) (Kaplansky) 9-564.

On the determination of the radical of a ring. *Izvestiya Akad. Nauk SSSR. Ser. Mat.* 16, 217-224 (1952). (Russian) (Kaplansky) 13-903.

Rings with minimality condition for ideals. *Doklady Akad. Nauk SSSR (N. S.)* 98, 329-332 (1954). (Russian) (Kaplansky) 16-441.

The radical in generalized Q-rings. *Izvestiya Akad. Nauk SSSR. Ser. Mat.* 18, 419-426 (1954). (Russian) (Kaplansky) 16-443.

Rings having minimal two-sided ideals. *Dokl. Akad. Nauk SSSR (N. S.)* 100, 405-408 (1955). (Russian) (Kaplansky) 16-896.

Rings with annihilator condition. *Izv. Akad. Nauk SSSR. Ser. Mat.* 20 (1956), 547-568. (Russian) (I. Kaplansky) 18-277.

Biregular rings. *Mat. Sb. N. S.* 39 (81) (1956), 447-464. (Russian) (F. J. Terpstra) 19-244.

Contribution to the theory of radicals in associative rings. *Dokl. Akad. Nauk SSSR (N. S.)* 113 (1957), 487-490. (Russian) (R. A. Good) 19-835.

Antisimple and strongly idempotent rings. *Izv. Akad. Nauk SSSR. Ser. Mat.* 21 (1957), 125-144. (Russian) (L. Fuchs) 19-244.

Modular ideals, radicals and semisimplicity of rings. *Uspehi Mat. Nauk (N. S.)* 12 (1957), no. 3 (75), 133-139. (Russian) (R. A. Good) 19-726.

Radicals of associative rings. I. *Mat. Sb. N. S.* 44 (86) (1958), 179-212. (Russian) (R. A. Good) 20 #5220.

Andrunakievitch, V. See Andrunakievič, V. A.

Aneckstein, Jules.

Un système particulier de nombres hypercomplexes et son application à l'étude des systèmes planétaires. *Acad. Roy. Belgique. Bull. Cl. Sci.* (5) 37, 459-479 (1951). (Leimanis) 13-390.

Anfertieva, E. A. (=Anfert'eva, E. A.)

Sur les formules sommatoires et les identités analytiques, liées à une classe de fonctions arithmétiques. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 30, 391-393 (1941). (Erdős) 2-347.

On the transformation formulas of Vinogradov-Corput. *Doklady Akad. Nauk SSSR (N. S.)* 60, 541-544 (1948). (Russian) (Shapiro) 10-17.

On the representation of certain special Dirichlet series by definite integrals. *Izvestiya Akad. Nauk SSSR. Ser. Mat.* 12, 79-96 (1948). (Russian) (Shapiro) 9-571.

Summation formulas containing special numerical functions. *Mat. Sbornik N. S.* 27 (69), 69-84 (1950). (Russian) (Shapiro) 12-319.

Angelescu, Tr.

Sur l'intégration d'une équation aux dérivées partielles. *Com. Acad. R. P. Romîne* 6 (1956), 1289-1292. (Romanian. Russian and French summaries) (D. J. Struik) 20 #1332.

Angeletti, Yves.

Plans et droites d'appui des corps convexes. *Bull. Soc. Roy. Sci. Liège* 9, 117-119 (1940). (Scherk) 7-168.

The integral equations of the dynamics of an elastic body. Doklady Akad. Nauk SSSR (N. S.) 76, 501-503 (1951). (Russian) (Diaz) 13-88.

A new solution of the problem of the computation of a vector from its curl and divergence. Doklady Akad. Nauk SSSR (N. S.) 79, 29-32 (1951). (Russian) (Atkinson) 13-460.

The fundamental integral equations of the dynamics of an elastic body. Doklady Akad. Nauk SSSR (N. S.) 81, 513-516 (1951). (Russian) (Diaz) 14-220.

Extension of A. N. Krylov's method to polynomial matrices. Doklady Akad. Nauk SSSR (N. S.) 81, 749-752 (1951). (Russian) (Forsythe) 14-92.

Investigations in the mechanics of a continuous medium. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 9, 60-101 (1952). (Russian) (Erickson) 15-360.

Resolvents of basic problems in field theory. Doklady Akad. Nauk SSSR (N. S.) 82, 545-548 (1952). (Russian) (Atkinson) 14-46.

Functions of the stress tensor of hydrodynamics. Doklady Akad. Nauk SSSR (N. S.) 83, 195-198 (1952). (Russian) (Giese) 13-1000.

Integral representation of a vector field. Doklady Akad. Nauk SSSR (N. S.) 85, 55-58 (1952). (Russian) (Atkinson) 14-46.

Conditions of applicability of a potential method of integration of the equations of motion of nonholonomic conservative systems. Doklady Akad. Nauk SSSR (N. S.) 87, 15-18 (1952). (Russian) (Leimanis) 14-694.

Involutions systems of zero rank. Akad. Nauk Uzbek SSR. Trudy Inst. Mat. Meh. 9, 102-123 (1952). (Russian) (Wundheiler) 15-171.

Construction of the integral equations of statics in the theory of elasticity by means of Green's functions. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 10 (1953), no. 2, 5-25. (Russian) (J. B. Diaz) 19-193.

Qualitative difference of holonomic from nonholonomic systems. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 10 (1953), no. 2, 179-185. (Russian) 19-37.

Vector potentials of the dynamics of an elastic body. Doklady Akad. Nauk SSSR (N. S.) 88, 961-964 (1953). (Russian) (Diaz) 15-425.

On a theorem of Hamilton-Jacobi type. Doklady Akad. Nauk SSSR (N. S.) 91, 463-466 (1953). (Russian) (Wundheiler) 15-171.

Stress tensor functions for the dynamics of an elastic body. Dokl. Akad. Nauk Uzbek. SSR. 1953, no. 7, 3-4. (Russian, Uzbek summary) (J. B. Diaz) 19-196.

Representation of the dynamical displacement vector by dependent wave functions. Dokl. Akad. Nauk Uzbek. SSR. 1953, no. 10, 3-5. (Russian, Uzbek summary) (J. B. Diaz) 19-193.

On integration of a canonical system of equations in exact differentials. Uspehi Matem. Nauk (N. S.) 8, no. 3 (55), 99-104 (1953). (Russian) (Pinl) 15-317.

Parametric representation of solutions of a system of linear functional equations in commutative operators. Uspehi Matem. Nauk (N. S.) 8, no. 3 (55), 157-160 (1953). (Russian) (Erickson) 15-233.

Integral'nye uravneniya osnovnykh zadach teorii polya i teorii uprugosti. [Integral equations of basic problems in the theory of vector fields and in elasticity.] Izdat. Akad. Nauk. Uzbek. SSR, Tashkent, 1954. 107 pp. (F. Smithies) 20 #4944.

Dynamical potentials of the theory of elasticity. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 13 (1954), 3-17. (Russian) (J. B. Diaz) 18-837.

Integral equations of the fundamental problems of the theory of a field. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 13 (1954), 19-41. (Russian) (J. B. Diaz) 18-808.

On an error in the theory of integration of the equations of motion of holonomic and nonholonomic systems. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 13 (1954), 163-167. (Russian) 19-37.

Representation of a displacement vector by retarded potentials. Doklady Akad. Nauk SSSR (N. S.) 94, 393-396 (1954). (Russian) (Diaz) 16-368.

On the application of functions of a complex variable to the dynamics of a material point. Doklady Akad. Nauk SSSR (N. S.) 96, 21-24 (1954). (Russian) (Kaplan) 16-757.

On the equations of rotation of a heavy rigid body about a fixed point. Doklady Akad. Nauk SSSR (N. S.) 97, 403-406 (1954). (Russian) (Wundheiler) 16-295.

On a method of integration of partial differential equations of the first order. Uspehi Matem. Nauk (N. S.) 9, no. 3 (61), 115-118 (1954). (Russian) (Pinl) 16-479.

Extension of the method of characteristics to simultaneous partial differential equations of the first order. Uspehi Matem. Nauk (N. S.) 9, no. 3 (61), 119-125 (1954). (Russian) (Pinl) 16-479.

Regular integral equations of the dynamics of an elastic body. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 15 (1955), 79-85. (Russian) (J. B. Diaz) 18-840.

Extension of the potential method of integration to canonical involution systems in exact differentials. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 15 (1955), 87-91. (Russian) 19-37.

Retarded potentials of the dynamic of an elastic body. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 16 (1955), 5-22. (Russian) (J. B. Diaz) 20 #4951.

On the method of characteristics for simultaneous partial differential equations of the first order. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 16 (1955), 23-27. (Russian) (M. Pinl) 18-397.

A system of ordinary differential equations which permits a potential method of integration. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 16 (1955), 28-33. (Russian) 19-33.

Representation of an electromagnetic field by retarded potentials. Dokl. Akad. Nauk SSSR (N. S.) 100, 1053-1056 (1955). (Russian) (Diaz, J. B.) 16-1181.

On a connection of a bi-wave field with the dynamical theory of elasticity. Dokl. Akad. Nauk SSSR (N. S.) 104 (1955), 520-523. (Russian) (J. B. Diaz) 17-684.

Representation of the bi-wave vector by potentials with double retardation. Dokl. Akad. Nauk Uzbek. SSR 1955, no. 8, 3-7. (Russian, Uzbek summary) 20 #5365.

On chain systems of a meson field. Dokl. Akad. Nauk SSSR (N. S.) 110 (1956), 351-354. (Russian) (N. Rosen) 19-365.

Representations of the meson field by retarded potentials. Dokl. Akad. Nauk SSSR (N. S.) 110 (1956), 953-956. (Russian) (J. B. Diaz) 19-222.

Universal significance of contact transformations. Uspehi Mat. Nauk (N. S.) 11 (1956), no. 1 (67), 167-172. (Russian) (M. Pinl) 18-44.

Direct proof of a theorem concerning the universal significance of contact transformations. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 21 (1957), 35-39. (Russian) (E. Leimanis) 20 #3654.

---- and Bondarenko, B. A.

On the representation of general solutions of the theory of elasticity by definite integrals. Akad. Nauk Uzbek. SSR. Trudy Inst. Mat. Meh. 16 (1955), 34-38. (Russian) 19-336. Arzelies, Henri, (=Arzelies, Henri)

Bagchi, Haridas. (=Bagchi, Hari Das; Bagchi, Hari das)

The method of difference equations applied to the summation of certain series involving Legendre and Bessel functions. J. Indian Math. Soc. (N.S.) 4, 13-24 (1940). (Szegő) 2-44.

A note on cyclides. J. Indian Math. Soc. (N.S.) 4, 120-124 (1940). (Helly) 2-159.

On a class of functional equations. Sankhya 5, 71-78 (1940). (Basoco) 4-145.

Cylindroid and kindred surfaces. Bull. Calcutta Math. Soc. 33, 129-146 (1941). (Helly) 4-53.

On bicircular quartics. J. Indian Math. Soc. (N.S.) 5, 46-47 (1941). (Helly) 3-87.

Note on the common tangents of a cubic and one of its sextactic conics. Bull. Calcutta Math. Soc. 40, 135-139 (1948). (Semple) 10-730.

Circles of double contact of a bi-circular quartic. Bull. Calcutta Math. Soc. 40, 207-225 (1948). (Semple) 10-730.

Note on a class of infinite Riemannian integrals. Bull. Calcutta Math. Soc. 41, 103-112 (1949). (Randolph) 11-346.

Note on critic centres and coincidence points of cubic curves. J. Indian Math. Soc. (N.S.) 13, 73-75 (1949). (Semple) 11-454.

Some novel properties of cyclides and hyper-cyclides. J. Roy. Asiatic Soc. Bengal. Sci. 15, 121-130 (1949). (Semple) 11-682.

Note on the sextactic points of a cubic and its Hessian. J. Roy. Asiatic Soc. Bengal. Sci. 15, 131-138 (1949). (Semple) 11-682.

Note on the two congruences $ax^2 + by^2 + e \equiv 0$, $ax^2 + by^2 + cz^2 + dw^2 \equiv 0 \pmod{p}$, where p is an odd prime and $a \not\equiv 0$, $b \not\equiv 0$, $c \not\equiv 0$, $d \not\equiv 0 \pmod{p}$. Rend. Sem. Mat. Univ. Padova 18, 311-315 (1949). (Niven) 11-229.

On the invariant relation between two cogate sextactic conics of a cubic. Proc. Indian Acad. Sci., Sect. A. 31, 16-20 (1950). 12-125.

Note on a certain Cremona transformation associated with a plane triangle. Rend. Sem. Mat. Univ. Padova 19, 231-236 (1950). (Bureau) 12-741.

On rational (or Heron) triangles. Math. Student 18 (1950), 33-36 (1951). 12-629.

Note on systems of equi-potential n -surfaces (especially, n -ellipsoids) in an $(n+1)$ -space. Bull. Calcutta Math. Soc. 46, 25-28 (1954). (Jackson) 16-166.

Note on an equi-momental complex of a rigid body. J. Math. Physics 32, 307-311 (1954). (MacColl) 15-475.

---- and Chaki, Manindra Chandra.

Note on certain remarkable types of plane collineations. Ann. Scuola Norm. Super. Pisa (3) 6, 85-97 (1952). (Du Val) 14-895.

Note on autopolar plane cubics. Rend. Sem. Mat. Univ. Padova 21, 316-334 (1952). (Huff) 14-1116.

---- and Chakrabarti, Nalinikanta.

Note on Laguerre's polynomial $L_n(z)$ and its associated equations (functional and differential). Bull. Calcutta Math. Soc. 42, 17-24 (1950). (Erdélyi) 12-96.

Note on a triad of functional equations connected with the Laguerre's polynomial $L_n(z)$. Bull. Calcutta Math. Soc. 42, 57-60 (1950). (Erdélyi) 12-96.

On Tschebyscheff's function $T_n(z)$ and its associated equations. J. Indian Math. Soc. (N.S.) 14, 35-42 (1950). (Erdélyi) 12-178.

Some further relations connected with Tschebyscheff's function $T_n(z)$. J. Indian Math. Soc. (N.S.) 14, 43-46 (1950). (Erdélyi) 12-178.

Note on certain integrals and series involving Tschebyscheff's functions. Bull. Calcutta Math. Soc. 43, 37-40 (1951). (Erdélyi) 13-345.

---- and Chatterji, Phatik Chand.

Note on a functional equation, connected with the Weierstrassian function $\wp(z)$. Bull. Calcutta Math. Soc. 42, 49-52 (1950). (Sheffer) 12-106.

Note on Hermite's function $H_n(z)$ and its associated equations (functional and differential). J. Roy. Asiatic Soc. Bengal. Sci. 16, 17-26 (1950). (Erdélyi) 13-649.

Note on Weber's parabolic cylinder function $D_n(z)$ and its associated equations (functional and differential). Ann. Scuola Norm. Super. Pisa (3) 5, 71-80 (1951). (Erdélyi) 13-554.

On a (third) functional equation, connected with the Weierstrassian function $\wp(z)$. Boll. Un. Mat. Ital. (3) 6, 280-284 (1951). (Sheffer) 13-752.

Note on a second functional equation, connected with the function $\wp(z)$. Amer. Math. Monthly 59, 91-92 (1952). (Sheffer) 13-752.

Note on certain functional equations, connected with Hermite and Weber functions. Ann. Scuola Norm. Super. Pisa (3) 6, 75-83 (1952). (Erdélyi) 14-641.

Linear difference equations associated with certain special functions. J. Indian Math. Soc. (N.S.) 16, 37-40 (1952). (Erdélyi) 13-842.

---- and Mukherji, Biswarup.

Note on a circular cubic with a real inflexion at infinity.

Bull. Calcutta Math. Soc. 42, 73-81 (1950). (Hollcroft) 12-851.

Note on a circular cubic with a real coincidence point at infinity. Bull. Calcutta Math. Soc. 43, 101-108 (1951). 13-975.

Note on a circular cubic, having one or more sextactic points at infinity. I. Rend. Sem. Mat. Univ. Padova 20, 365-380 (1951). (Du Val) 13-975.

Note on the circular cubic and bi-circular quartics with four assigned cyclic points. II. Rend. Sem. Mat. Univ. Padova 20, 381-388 (1951). (Du Val) 13-975.

Note on certain remarkable types of curves, surfaces and hyper-surfaces. Rend. Sem. Mat. Univ. Padova 21, 395-405 (1952). (Huff) 14-1116.

---- and Mukherjee, Bhola Nath.

A note on the generalised Laguerre polynomial. Proc. Indian Acad. Sci., Sect. A. 35, 53-55 (1952). (Szegő) 13-941.

Note on a sequence of functions, defined by a difference-equation. Simon Stevin 29, 185-189 (1952). (Erdélyi) 15-424.

Note on certain equations connected with Gegenbauer functions. Ann. Scuola Norm. Super. Pisa (3) 6 (1952), 281-290 (1953). (Erdélyi) 14-1084.

Note on certain equations, connected with Bateman functions. Ann. Scuola Norm. Super. Pisa (3) 6 (1952), 269-280 (1953). (Erdélyi) 14-1084.

Note on the operational representations of some special functions. Math. Z. 60, 88-93 (1954). (Erdélyi) 15-791.

---- and Sarkar, Shib Sankar.

The relationship between harmonic and anharmonic collineations in a plane. Amer. Math. Monthly 61, 397-401 (1954). 15-817.

Bell, Eric Temple.

The Development of Mathematics. McGraw-Hill Book Company, Inc., New York, 1940. xiii + 583 pp. (Struik) 2-113.

Postulational bases for the umbral calculus. *Amer. J. Math.* 62, 717-724 (1940). (Frink) 2-99.

Compound multiplicative Diophantine systems. *Proc. Nat. Acad. Sci. U. S. A.* 26, 462-466 (1940). (Barnett) 1-291.

Transformed multiplicative diophantine equations. *Trav. Inst. Math. Tbilissi [Trudy Tbiliss. Mat. Inst.]* 8, 1-21 (1940). (English, Russian summary) (Barnett) 3-65.

Selective equations. *Ann. of Math. (2)* 42, 1029-1036 (1941). (Lehmer) 3-268.

Note on a certain type of Diophantine system. *Bull. Amer. Math. Soc.* 47, 155-159 (1941). (Barnett) 2-248.

Newton after three centuries. *Amer. Math. Monthly* 49, 553-575 (1942). 4-65.

Parametric solutions of certain Diophantine equations. *Duke Math. J.* 9, 431-435 (1942). (Barnett) 4-34.

Interpolated denominators and Lambert series. *Amer. J. Math.* 65, 382-386 (1943). (Lehmer) 5-92.

Algebraic identities in the theory of numbers. *Amer. Math. Monthly* 50, 535-541 (1943). (Lehmer) 5-90.

Note on a conjecture due to Euler. *Bull. Amer. Math. Soc.* 49, 393-394 (1943). (Lehmer) 4-240.

Polynomials on a finite discrete range. *Duke Math. J.* 10, 33-47 (1943). (Kaplansky) 4-129.

A type of universal arithmetical forms. *Proc. Nat. Acad. Sci. U. S. A.* 29, 375-378 (1943). (Barnett) 5-141.

Sixes and sevens. *Scripta Math.* 9, 209-231 (1943). (Neugebauer) 6-253.

Gauss and the early development of algebraic numbers. *Nat. Math. Mag.* 18, 188-204 (1944). 5-253.

Gauss and the early development of algebraic numbers. *Nat. Math. Mag.* 18, 219-223 (1944). 5-253.

- The golden and platinum proportions. *Nat. Math. Mag.* 19, 21-26 (1944). 6-141.
- A method in rational diophantine analysis. *Proc. Nat. Acad. Sci. U. S. A.* 30, 355-359 (1944). (Barnett) 6-57.
- Sixes and sevens. *Scripta Math.* 10, 81-147 (1944). (Neugebauer) 6-253.
- The Development of Mathematics. 2d ed. McGraw-Hill Book Company, Inc., New York, 1945. xiii + 637 pp. (Struik) 8-1.
- A representation of certain integer powers. *Nat. Math. Mag.* 20, 3-4 (1945). (Jones) 7-146.
- Universal rational functions. *Proc. Nat. Acad. Sci. U. S. A.* 31, 317-319 (1945). (Jones) 7-49.
- Sixes and sevens. *Scripta Math.* 11, 21-50 (1945). (Neugebauer) 6-253.
- Sixes and sevens. *Scripta Math.* 11, 139-171 (1945). (Neugebauer) 7-353.
- Separable Diophantine equations. *Trans. Amer. Math. Soc.* 57, 86-101 (1945). (Barnett) 6-256.
- The Magic of Numbers. Whittlessey House, McGraw-Hill Book Company, New York and London, 1946. viii + 418 pp. (Dijksterhuis) 8-305.
- Mahavira's Diophantine system. *Bull. Calcutta Math. Soc.* 38, 121-122 (1946). (Gage) 8-369.
- Obituary: Harry Bateman. *Quart. Appl. Math.* 4, 105-111 (1946). 8-3.
- Sixes and sevens. *Scripta Math.* 12, 53-60 (1946). (Neugebauer) 8-189.
- Diophantine equations suggested by elementary geometry. *Ann. of Math.* (2) 48, 43-50 (1947). (Kempner) 8-442.
- Analogues for arithmetical functions of the elementary transcendental functions. *Math. Mag.* 21, 65-73 (1947). (Hartman) 9-412.
- The problems of congruent numbers and concordant forms. *Proc. Nat. Acad. Sci. U. S. A.* 33, 326-328 (1947). (Gage) 9-175.
- A Pythagorean variation. *Scripta Math.* 13, 163-168 (1947). (Niven) 9-497.
- The problem of Liouville's theorems on arithmetical quadratic forms. *Scripta Math.* 13, 177-185 (1947). 9-412.
- A type of inversion of certain series. *Duke Math. J.* 15, 79-85 (1948). (Lehmer) 10-591.
- The basic lemma in multiplicative Diophantine analysis. *Math. Gaz.* 32, 182-183 (1948). (Niven) 10-353.
- Derived Diophantine systems. *Revista Cl., Lima* 50, 69-84 (1948). (Niven) 10-592.
- A Diophantine equation. *Amer. Math. Monthly* 56, 1-4 (1949). (Niven) 10-353.
- Solution of a functional equation in the multiplicative theory of numbers. *Math. Mag.* 24, 233-235 (1951). (Erdős) 13-14.

A note on determinants and Hadamard's inequality. *Amer. Math. Monthly* 50, 550-551 (1943). 5-87.

Random summability and Fourier series. *Bull. Amer. Math. Soc.* 49, 732-733 (1943). (A. Zygmund) 5-66, 8-708.

Lambert summability of orthogonal series. *Bull. Amer. Math. Soc.* 49, 932-934 (1943). (Zygmund) 5-117.

Fourier integrals. *Duke Math. J.* 10, 247-248 (1943). (Pollard) 4-272.

An integral inequality. *Duke Math. J.* 10, 547-550 (1943). (Perkins) 5-1.

Convergence of nonharmonic Fourier series. *Duke Math. J.* 10, 551-552 (1943). (Kac) 5-4.

Almost periodic gap series. *Duke Math. J.* 10, 641-642 (1943). (Zygmund) 5-119.

The stability of solutions of linear differential equations. *Duke Math. J.* 10, 643-647 (1943). (Levinson) 5-145.

A generalization of a Zygmund-Bernstein theorem. *Duke Math. J.* 10, 649-651 (1943). (Zygmund) 5-119.

A note on periodic functions and their derivatives. *J. London Math. Soc.* 18, 140-142 (1943). (Zygmund) 5-230.

Almost orthogonal series. *Bull. Amer. Math. Soc.* 50, 517-519 (1944). (Pollard) 6-48.

A note on an inequality of E. Schmidt. *Bull. Amer. Math. Soc.* 50, 734-736 (1944). (Pollard) 6-61.

A note on a theorem of Hardy on Fourier constants. *Bull. Amer. Math. Soc.* 50, 741-744 (1944). (Zygmund) 6-125.

A stability property of solutions of linear differential equations. *Duke Math. J.* 11, 513-516 (1944). (Dressel) 6-66.

Some applications of the Fourier integral to generalized trigonometric series. *Duke Math. J.* 11, 703-713 (1944). (Pollard) 6-173.

A note on mean values. *Univ. Nac. Tucumán, Revista A.* 4, 255-258 (1944). (Boas) 7-57.

On the stability of systems of differential equations. *Proc. Nat. Acad. Sci. U.S.A.* 32, 190-193 (1946). (Levinson) 8-70.

A note on relatively prime sequences. *Bull. Amer. Math. Soc.* 53, 778-779 (1947). (Erdős) 9-11.

The boundedness of solutions of linear differential equations. *Duke Math. J.* 14, 83-97 (1947). (Levinson) 9-35.

The Dirichlet divisor problem. *Duke Math. J.* 14, 411-417 (1947). (Titchmarsh) 9-11.

The boundedness of solutions of infinite systems of linear differential equations. *Duke Math. J.* 14, 695-706 (1947). (Hartman) 9-145.

On the boundedness of solutions of nonlinear differential and difference equations. *Trans. Amer. Math. Soc.* 62, 357-386 (1947). (Levinson) 9-436.

On an application of a Banach-Steinhaus theorem to the study

of the boundedness of solutions of non-linear differential and difference equations. *Ann. of Math.* (2) 49, 515-522 (1948). (Bohnenblust) 10-121.

Some properties of summation kernels. *Duke Math. J.* 15, 1013-1019 (1948). (Chandrasekharan, K.) 10-292.

On the average value of arithmetic functions. *Proc. Nat. Acad. Sci. U.S.A.* 34, 149-152 (1948). (James) 9-499.

On the existence and boundedness of solutions of nonlinear partial differential equations of parabolic type. *Trans. Amer. Math. Soc.* 64, 21-44 (1948). (Dressel) 10-43.

A Survey of the Theory of the Boundedness, Stability, and Asymptotic Behavior of Solutions of Linear and Nonlinear Differential and Difference Equations. Office of Naval Research, Washington, D. C., 1949. vi + 156 pp. (Copson) 11-31.

On the existence and boundedness of solutions of non-linear differential-difference equations. *Ann. of Math.* (2) 50, 347-355 (1949). (Levinson) 10-715.

An analog of an identity due to Wilton. *Duke Math. J.* 16, 539-545 (1949). (Heilbronn) 11-420.

Wigert's approximate functional equation and the Riemann zeta-function. *Duke Math. J.* 16, 547-552 (1949). (Atkinson) 11-234.

On the asymptotic behavior of solutions of $u'' - (1 + f(t))u = 0$. *Ann. Mat. Pura Appl.* (4) 31, 83-91 (1950). (Reuter) 13-132.

A note on the summability of formal solutions of linear integral equations. *Duke Math. J.* 17, 53-55 (1950). (Lorentz) 11-365.

Ramanujan sums and the average value of arithmetic functions. *Duke Math. J.* 17, 159-168 (1950). (de Bruijn) 11-715.

Generalized Eisenstein series and non-analytic automorphic functions. *Proc. Nat. Acad. Sci. U.S.A.* 36, 356-359 (1950). (Lehner) 12-319.

On some divisor sums associated with Diophantine equations. *Quart. J. Math., Oxford Ser.* (2) 1, 136-146 (1950). (Niven) 12-80.

On the functional equations of the Dirichlet series derived from Siegel modular forms. *Proc. Nat. Acad. Sci. U.S.A.* 37, 84-87 (1951). (Lehner) 13-15.

On an equation occurring in the harmonic analysis of viscous fluid flow. *Quart. Appl. Math.* 9, 218-223 (1951). (Kampé de Fériet) 14-327.

A note on scalar functions of matrices. *Amer. Math. Monthly* 59, 391 (1952). (Givens) 14-6.

The iteration of power series in two variables. *Duke Math. J.* 19, 339-347 (1952). (Valiron) 14-37.

On approximate expressions for the exponential integral and the error function. *J. Math. Physics* 30, 226-231 (1952). (Kuntzmann) 13-690.

On the theory of dynamic programming. *Proc. Nat. Acad. Sci. U.S.A.* 38, 716-719 (1952). (Kiefer) 14-392.

On games involving bluffing. *Rend. Circ. Mat. Palermo* (2) 1, 139-156 (1952). (Gale) 14-778.

Stability theory of differential equations. McGraw-Hill Book Company, Inc., New York-Toronto-London, 1953. xiii + 166 pp. (Reuter) 15-794.

An introduction to the theory of dynamic programming. The Rand Corporation, Santa Monica, Calif., 1953. x + 99 pp. (Blackwell) 15-887.

Notes on matrix theory. II. *Amer. Math. Monthly* 60, 173-175 (1953). (Givens) 14-731.

On an inequality due to Weinberger. *Amer. Math. Monthly* 60, 402 (1953). 14-957.

Bottleneck problems and dynamic programming. *Proc. Nat. Acad. Sci. U.S.A.* 39, 947-951 (1953). (Kuhn) 15-888.

On a generalization of classical probability theory. I. Markoff chains. *Proc. Nat. Acad. Sci. U.S.A.* 39, 1075-1077 (1953). (Doob) 15-330.

Some functional equations in the theory of dynamic programming. *Proc. Nat. Acad. Sci. U.S.A.* 39, 1077-1082 (1953). (Blackwell) 15-887.

A survey of the mathematical theory of time-lag, retarded control, and hereditary processes. With the assistance of

John M. Danskin, Jr. The Rand Corporation, Santa Monica, Calif., 1954. xi + 107 pp. (Trititzinsky) 15-962.

Dynamic programming of continuous processes. The Rand Corporation, Santa Monica, Calif., 1954. xviii + 141 pp. (Danskin) 17-171.

Teoriya ustoychivosti resheniĭ differentsial'nykh uravneniĭ. [Stability theory of differential equations.] Translated by A. D. Myĭskis. Izdat. Inostrannof Lit., Moscow, 1954. 216 pp. 17-734.

The theory of dynamic programming. Bull. Amer. Math. Soc. 60, 503-515 (1954). (Kuhn) 16-732.

Limit theorems for non-commutative operations. I. Duke Math. J. 21, 491-500 (1954). (Wolfowitz) 15-969.

Some problems in the theory of dynamic programming. Econometrica 22, 37-48 (1954). (Blackwell) 15-713.

Some applications of the theory of dynamic programming—a review. J. Operations Res. Soc. Amer. 2, 275-288 (1954). 15-975.

Inequalities. Math. Mag. 28, 21-26 (1954). 16-118.

On some applications of the theory of dynamic programming to logistics. Naval Res. Logist. Quart. 1, 141-153 (1954). (Wolfowitz) 16-155.

Dynamic programming and a new formalism in the calculus of variations. Proc. Nat. Acad. Sci. U.S.A. 40, 231-235 (1954). (Danskin) 15-804.

Monotone approximation in dynamic programming and the calculus of variations. Proc. Nat. Acad. Sci. U.S.A. 40, 1073-1075 (1954). (Danskin) 16-714.

Dynamic programming and multi-stage decision processes of stochastic type. Proceedings of the Second Symposium in Linear Programming, Washington, D. C., 1955, pp. 229-249. National Bureau of Standards, Washington, D. C., 1955. (T. L. Saaty) 17-1103.

Notes on matrix theory. IV. An inequality due to Bergström. Amer. Math. Monthly 62, 172-173 (1955). (Givens) 17-336.

Notes on matrix theory. VII. Amer. Math. Monthly 62 (1955), 647-648. (W. Givens) 17-339.

Boundedness of the solutions of second order linear differential equations. Duke Math. J. 22 (1955), 511-513. (G. E. H. Reuter) 17-737.

On tables for the determination of transonic flow patterns. *Reissner Anniversary Volume, Contributions to Applied Mechanics*, pp. 13-36. J. W. Edwards, Ann Arbor, Michigan, 1948. (Lighthill) 10-753.

Two-dimensional transonic flow patterns. *Harvard University, Graduate School of Engineering, Operator Methods in the Theory of Compressible Fluids, Work Performed under Contract NORD 8555 Task F, Technical Report no. 10.* Cambridge, Mass., 1948. 47 pp. (Lighthill) 10-753.

Sur la fonction-noyau d'un domaine et ses applications dans la théorie des transformations pseudoconformes. *Mémor. Sci. Math.*, no. 108. Gauthier-Villars, Paris, 1948. 80 pp. (Thullen) 11-344.

Two-dimensional transonic flow patterns. *Amer. J. Math.* 70, 856-891 (1948). (Lighthill) 10-752.

Functions of extended class in the theory of functions of several complex variables. *Trans. Amer. Math. Soc.* 63, 523-547 (1948). (Thullen) 10-30.

Operator methods in the theory of compressible fluids. *Proc. Symposia Appl. Math.*, Vol. I, pp. 19-40. American Mathematical Society, New York, N. Y., 1949. (Lighthill) 11-222.

An initial value problem for a class of equations of mixed type. *Bull. Amer. Math. Soc.* 55, 165-174 (1949). (Bers) 10-540.

On two-dimensional supersonic flows. *Tech. Notes Nat. Adv. Comm. Aeronaut.*, no. 1875, 49 pp. (1949). (Lighthill) 11-222.

The Kernel Function and Conformal Mapping. *Mathematical Surveys*, No. 5. American Mathematical Society, New York, N. Y., 1950. vii + 161 pp. (Spencer, D. C.) 12-402.

Determination of axially symmetric flow patterns of a compressible fluid. *J. Math. Physics* 29, 133-145 (1950). (Lighthill) 12-451.

On solutions with algebraic character of linear partial differential equations. *Trans. Amer. Math. Soc.* 68, 461-507 (1950). (Brelot) 12-25.

On visualization of domains in the theory of functions of two complex variables. *Proceedings of the International Congress of Mathematicians*, Cambridge, Mass., 1950, vol. 1, pp. 363-373. *Amer. Math. Soc.*, Providence, R. I., 1952. (Behnke) 13-645.

Geometric and potential-theoretical methods in the theory of functions of several complex variables. Proceedings of the International Congress of Mathematicians, Cambridge, Mass., 1950, vol. 2, pp. 165-173. Amer. Math. Soc., Providence, R. I., 1952. (Behnke) 13-645.

The solution of boundary value problems by the method of the kernel function. Proceedings of the Association for Computing Machinery, Pittsburgh, 1952, pp. 187-192. Richard Rimbach Associates, Pittsburgh, Pa., 1952. 14-1020.

Methods for the determination of subsonic flows around profiles. Proceedings of the First U.S. National Congress of Applied Mechanics, Chicago, 1951, pp. 705-713. The American Society of Mechanical Engineers, New York, N. Y., 1952. (Bers) 15-263.

On solutions of linear partial differential equations of mixed type. Amer. J. Math. 74, 444-474 (1952). (Bers) 15-229.

The coefficient problem in the theory of linear partial differential equations. Trans. Amer. Math. Soc. 73, 1-34 (1952). (Nehari) 14-382.

Operatorenmethoden in der Gasdynamik. Z. Angew. Math. Mech. 32, 33-45 (1952). (Bers) 14-217.

Multivalued solutions of linear partial differential equations. Contributions to the theory of Riemann surfaces, pp. 229-245. Annals of Mathematics Studies, no. 30. Princeton University Press, Princeton, N. J., 1953. (Nehari) 15-229.

Kernel function and extended classes in the theory of functions of complex variables. Colloque sur les fonctions de plusieurs variables, tenu à Bruxelles, 1953, pp. 135-157. Georges Thone, Liège; Masson & Cie, Paris, 1953. (Bremermann) 15-865.

A theorem of Green's type for functions of two complex variables. Proc. Amer. Math. Soc. 4, 102-109 (1953). (Garabedian) 14-632.

On multivalued solutions of linear partial differential equations. Contributions to the theory of partial differential equations, pp. 63-68. Annals of Mathematics Studies, no. 33. Princeton University Press, Princeton, N. J., 1954. (Nehari) 16-705.

A method for solving boundary value problems of mathematical physics on punch card machines. J. Assoc. Computing Mach. 1, 101-104 (1954). (Isaacson) 16-291.

Essential singularities of solutions of a class of linear partial differential equations in three variables. J. Rational Mech. Anal. 3, 539-560 (1954). (Nehari) 16-705.

On zero and pole surfaces of functions of two complex variables. Trans. Amer. Math. Soc. 77, 413-454 (1954). (Bremermann) 16-462.

On representation of stream functions of subsonic and supersonic flows of compressible fluids. J. Rational Mech. Anal. 4 (1955), 883-905. (P. Germain) 17-549.

Tables for the determination of fundamental solutions of equations in the theory of compressible fluids. Math. Tables Aids Comput. 9, 8-14 (1955). (D. C. Pack) 16-1172.

Bounds for analytic functions in domains with a distinguished boundary surface. Math. Z. 63 (1955), 173-194. (H. Grauert) 17-785.

Some methods for solutions of boundary-value problems of linear partial differential equations. Proceedings of Symposia in Applied Mathematics. Vol. VI. Numerical analysis, pp. 11-29. Published by McGraw-Hill Book Company, Inc., New York, 1956 for the American Mathematical Society, Providence, R. I. (R. B. Davis) 18-73.

Multivalued harmonic functions in three variables. Comm. Pure Appl. Math. 9 (1956), 327-338. (R. B. Davis) 18-741.

Bounds for solutions of a system of partial differential equations. J. Rational Mech. Anal. 5 (1956), 993-1002. (R. B. Davis) 18-398.

New methods for solving boundary value problems. Z. Angew. Math. Mech. 36 (1956), 182-191. (German, French and Russian summaries) (M. Schiffer) 18-401.

On singularities of solutions of certain differential equations in three variables. Trans. Amer. Math. Soc. 85 (1957), 462-488. (H. J. Bremermann) 19-654.

Applications of function theoretical methods in the study of harmonic functions and vectors of three variables. Ann. Acad. Sci. Fenn. Ser. A. I, no. 250/2 (1958), 10 pp. (Bernard Epstein) 20 #5976.

Properties of solutions of certain differential equations in three variables. J. Math. Mech. 7 (1958), 87-101. (R. B. Davis) 20 #5336.

A class of pseudo-conformal and quasi-pseudo-conformal mappings. Math. Ann. 136 (1958), 134-138. (Bernard Epstein) 20 #2461.

Operators generating solutions of certain partial differential equations in three variables and their properties. I. Scripta Math. 23 (1957), 143-151 (1958). (Z. Nehari) 20 #5946.

---- and Epstein, Bernard.

Determination of a compressible fluid flow past an oval-shaped obstacle. J. Math. Physics 26, 195-222 (1948). (Sears) 10-162.

---- and Greenstone, Leonard.

Numerical determination by use of special computational devices of an integral operator in the theory of compressible fluids. I. Determination of the coefficients of the integral operator by the use of punch card machines. J. Math. Phys. Mass. Inst. Tech. 26, 1-9 (1947). 8-541.

---- et Marcinkiewicz, J.

Sur les fonctions analytiques de deux variables complexes. Fund. Math. 33, 75-94 (1939). (Martin) 1-10.

Sur les fonctions analytiques de deux variables complexes. J. Math. Phys. Mass. Inst. Tech. 21, 125-141 (1942). 4-156.

---- and Martin, W. T.

A modified moment problem in two variables. Duke Math. J. 6, 389-407 (1940). (Hildebrandt) 1-332.

---- and Schiffer, Menahem.

Bounded functions of two complex variables. Amer. J. Math. 66, 161-169 (1944). (Martin, W. T.) 5-235.

On Green's and Neumann's functions in the theory of partial differential equations. Bull. Amer. Math. Soc. 53, 1141-1151 (1947). (Brelot) 9-286.

A representation of Green's and Neumann's functions in the theory of partial differential equations of second order. Duke Math. J. 14, 609-638 (1947). (Brelot) 9-187.

Kernel functions in the theory of partial differential equations of elliptic type. Duke Math. J. 15, 535-566 (1948). (Pinl) 10-42.

Various kernels in the theory of partial differential equations. Proc. Nat. Acad. Sci. U.S.A. 36, 559-563 (1950). (Nehari) 12-503.

Some linear operators in the theory of partial differential equations. Proc. Nat. Acad. Sci. U.S.A. 36, 742-746 (1950). (Nehari) 12-503.

Kernel functions and conformal mapping. Compositio Math. 8, 205-249 (1951). (Nehari) 12-602.

Kernel functions and partial differential equations. I. Boundary value problems in the theory of non-linear partial differential equations of elliptic type. J. Analyse Math. 1, no. 2, 375-386 (1951). (Hebrew summary) (Nehari) 13-748.

A majorant method for non-linear partial differential equations. Proc. Nat. Acad. Sci. U.S.A. 37, 744-749 (1951). (Nehari) 13-749.

Theory of kernel functions in conformal mapping. Construction and applications of conformal maps. Proceedings of a Symposium, pp. 199-206. National Bureau of Standards, Appl. Math. Ser., No. 18, U.S. Government Printing Office, Washington, D. C., 1952. (Nehari) 14-860.

Potential-theoretic methods in the theory of functions of two complex variables. Compositio Math. 10, 213-240 (1952). (Nehari) 14-865.

Kernel functions and elliptic differential equations in mathematical physics. Academic Press Inc., New York, N. Y., 1953. xiii + 432 pp. (Garabedian) 14-876.

Properties of solutions of a system of partial differential equations. Studies in mathematics and mechanics presented to Richard von Mises, pp. 79-87. Academic Press Inc., New York, 1954. (Nehari) 16-705.

Une méthode de raccordement pour le calcul des cavités électromagnétiques. *C. R. Acad. Sci. Paris* 218, 186-188 (1944). (Erdélyi) 7-178.

Les principales méthodes de résolution numérique des équations intégrales de Fredholm et de Volterra. *Ann. Radio-élec.* 1, 311-318 (1945). 10-332.

Bernoulli, Daniel.

Exposition of a new theory on the measurement of risk.

Econometrica 22, 23-36 (1954). 15-591.

Bernoulli, Johann.

Der Briefwechsel von Johann Bernoulli. Bd.I. Herausgegeben von der Naturforschenden Gesellschaft in Basel. Birkhäuser Verlag Basel, 1955., 531 pp. (6 plates) 16-781.

Bernstein, B. A. (See also Foster, Alfred L.; Parker, W. L.)

Groups and Abelian groups in terms of negative addition and negation. *Duke Math. J.* 5, 871-874 (1939). (Frink) 1-104.

Postulate-sets for Boolean rings. *Trans. Amer. Math. Soc.* 55, 393-400 (1944). (Loomis) 5-226.

Weak definitions of field. *Duke Math. J.* 14, 475-482 (1947). (McCoy) 9-3.

A dual-symmetric definition of Boolean algebra free from postulated special elements. *Scripta Math.* 16, 157-160 (1950). (Curry) 12-583.

Bernstein, Barry.

On the uniqueness of ideal gas flows with a straight streamline. *Proc. Nat. Acad. Sci. U.S.A.* 42 (1956), 850-854. (J. L. Ericksen) 18-437.

---- and Ericksen, J. L.

Work functions in hypo-elasticity. *Arch. Rational Mech. Anal.* 1 (1958), 396-409. (W. Noll) 20 #7411.

---- and Thomas, T. Y.

The differential equations of the stream lines for compressible gas flow. *J. Rational Mech. Anal.* 4, 703-719 (1955). (P. Germain) 17-207.

---- and Truesdell, C.

The solution of linear differential systems by quadratures. *J. Reine Angew. Math.* 197 (1957), 104-111. (A. Edrei) 18-654.

Bernstein, C.

"Continuous" programming. *Economic activity analysis*, pp. 383-390. Edited by Oskar Morgenstern. John Wiley and Sons, Inc., New York; Chapman and Hall, Ltd, London, 1954. (Saaty) 16-732.

Bernstein, Dorothy L. (See also Coon, Geraldine A.)

The double Laplace integral. *Duke Math. J.* 8, 460-496 (1941). (Boas) 3-38.

Existence Theorems in Partial Differential Equations. *Annals of Mathematics Studies*, no. 23. Princeton University Press, Princeton, N. J., 1950. ix + 228 pp. (Janet) 12-262.

Bernstein, Ira B.

Improved calculations on cascade shower theory. *Physical Rev.* (2) 80, 995-1005 (1950). (Chandrasekhar) 12-833.

Waves in a plasma in a magnetic field. *Phys. Rev.* (2) 109 (1958), 10-21. (O. Buneman) 19-1010.

---- Frieman, E. A.; Kruskal, M. D.; and Kulsrud, R. M.

An energy principle for hydromagnetic stability problems. *Proc. Roy. Soc. London, Ser. A*, 244 (1958), 17-40. (K. C. Westfold) 19-1009.

Bernstein, Jeremy.

Scattering of K⁺ particles from protons and deuterons.

Phys. Rev. (2) 105 (1957), 1853-1858. (C. Strachan) 19-924.

Bernstein, R. I. See Miller, K. S.

Bernstein, Serge N. (=Bernšteĭn, S. N.) (See also Ahiezer, N. I.)

Correction d'une démonstration. *C. R. (Doklady) Acad.*

Sci. URSS (N. S.) 25, 707-709 (1939). 1-345.

Some remarks concerning the limit theorem of Liapunov.

Doklady Akad. Nauk SSSR (N. S.) 24, 3-7 (1939). (Russian) (Doob) 1-340.

Sur une classe d'équations fonctionnelles aux dérivées partielles. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 4, 17-26 (1940). (Russian, French summary) (Trjitzinsky) 2-102.

Nouvelles applications des grandeurs aléatoires presque indépendantes. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 4, 137-150 (1940). (Russian, French summary) (Doob) 2-107.

Sur la meilleure approximation locale des fonctions. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 26, 843-846 (1940). (Jackson) 2-193.

Sur un problème du schéma des urnes à composition variable. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 28, 5-7 (1940). (Feller) 2-229.

Première note sur les opérateurs différentiels linéaires. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 29, 532-535 (1940). (Trjitzinsky) 2-289.

The Petersburg school of the theory of probability. *Lenin-grad State Univ. Annals [Uchenye Zapiski] Math. Ser.* 10, 3-11 (1940). (Russian) 2-114.

Sur l'approximation d'une fonction continue par un opérateur linéaire différentiel d'un polynôme. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 5, 15-42 (1941). (Russian, French summary) (Shohat) 2-363.

On "fiducial" probabilities of Fisher. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 5, 85-94 (1941). (Russian, English summary) (Neyman) 3-7.

Sur les sommes de grandeurs aléatoires liées de classes (A, N) et (B, N). *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 32, 303-307 (1941). (Feller) 6-88.

Solution of a mathematical problem connected with the theory of heredity. *Ann. Math. Statistics* 13, 53-61 (1942). 3-176.

Renforcement de mon théorème sur les surfaces à courbure négative. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 6, 285-290 (1942). (Russian, French summary) (Beckenbach) 5-14.

Retour au problème de l'évaluation de l'approximation de la formule limite de Laplace. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 7, 3-16 (1943). (Russian, French summary) (Feller) 5-41.

Sur les domaines de convergence des polynômes $\sum_0^n C_n m^n (m/n) x^m (1-x)^{n-m}$. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 7, 49-88 (1943). (Russian, French summary) (Shohat) 5-180, 328.

Complément à mon article "Renforcement du théorème des surfaces à courbure négative". *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 7, 297-298 (1943). (Russian) 6-20.

Nouvelles généralisations du théorème de Liouville et son extension aux équations du type parabolique. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 42, 103-107 (1944). (Beckenbach) 6-187.

Naučnoe Nasledie P. L. Čebyševa. Vypusk Pervyĭ: Matematika. [The Scientific Legacy of P. L. Čebyšev. First

Part: Mathematics]. (Editor) Akademiya Nauk SSSR, Moscow-Leningrad, 1945. 174 pp. (1 plate) (Russian) 7-355.

Constructive theory of functions as a development of Tchebychev's ideas. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 9, 145-158 (1945). (Russian, English summary) (Zygmund) 7-53.

Sur la meilleure approximation des fonctions $\int_0^x y^s d\varphi(s)$ sur le segment $(-1, +1)$. *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 10, 185-196 (1946). (Russian, French summary) (Offord) 8-267.

Complément au travail de I. Ibraghimoff "Sur la valeur asymptotique de la meilleure approximation d'une fonction ayant un point singulier réel". *Bull. Acad. Sci. URSS, Sér. Math. [Izvestia Akad. Nauk SSSR]* 10, 461-462 (1946). (Russian, French summary) (Offord) 8-459.

Sur le théorème limite de la théorie des probabilités. *Bull. [Izvestiya] Math. Mech. Inst. Univ. Tomsk* 3, 174-190 (1946). (Russian, French summary) (Feller) 8-471.

Sur la meilleure approximation sur tout l'axe réel des fonctions continues par des fonctions entières de degré fini. I. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 51, 331-334 (1946). (Boas) 8-20.

Sur la meilleure approximation sur tout l'axe réel par des fonctions entières de degré fini. II. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 51, 487-490 (1946). (Boas) 8-20.

Sur la borne supérieure du module de la dérivée d'une fonction de degré fini. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 51, 567-568 (1946). (Kober) 8-144.

Sur la meilleure approximation des fonctions sur l'axe réel par des fonctions entières de degré fini. III. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 52, 563-566 (1946). (Kober) 8-323.

Généralisation d'un résultat de S. M. Nikolsky. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 53, 583-585 (1946). (Kober) 8-378.

Sur la meilleure approximation sur tout l'axe réel par des fonctions entières de degré fini. IV. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 54, 103-108 (1946). (Kober) 8-373.

Sur la meilleure approximation sur tout l'axe réel par des fonctions entières de degré fini. V. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 54, 475-478 (1946). (Kober) 8-509.

Démonstration nouvelle et généralisation de quelques formules de la meilleure approximation. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 54, 663-664 (1946). (Kober) 8-576.

On the best approximation to analytic functions with the aid of entire functions of finite degree. *Doklady Akad. Nauk SSSR (N. S.)* 56, 891-894 (1947). (Russian) (Boas) 9-180.

On limiting dependences between constants of the theory of best approximation. *Doklady Akad. Nauk SSSR (N. S.)* 57, 3-5 (1947). (Russian) (Boas) 9-179.

On properties of homogeneous functional classes. *Doklady Akad. Nauk SSSR (N. S.)* 57, 111-114 (1947). (Russian) (Zygmund) 9-235.

Limit laws of the theory of best approximation. *Doklady Akad. Nauk SSSR (N. S.)* 58, 525-528 (1947). (Russian) (Boas) 9-427.

On certain elementary extremal properties of polynomials in several variables. *Doklady Akad. Nauk SSSR (N. S.)* 59, 833-836 (1948). (Russian) (Kogbetliantz) 9-429.

A second note on homogeneous functional classes. *Doklady Akad. Nauk SSSR (N. S.)* 59, 1379-1384 (1948). (Russian) (Boas) 9-427.

On entire functions of finite degree of several complex variables. *Doklady Akad. Nauk SSSR (N. S.)* 60, 949-952 (1948). (Russian) (Boas) 10-29, 14-1277.

A generalization of an inequality of S. B. Stečkin to entire functions of finite degree. *Doklady Akad. Nauk SSSR (N. S.)* 60, 1487-1490 (1948). (Russian) (Boas) 9-579.

The extension of properties of trigonometric polynomials to entire functions of finite degree. *Izvestiya Akad. Nauk SSSR, Ser. Mat.* 12, 421-444 (1948). (Russian) (Boas) 10-363.

A remark on my paper "The extension of properties of trigonometric polynomials to entire functions of finite degree." *Izvestiya Akad. Nauk SSSR, Ser. Mat.* 12, 571-573 (1948). (Russian) (Boas) 10-363.

Integration and differentiation in partially ordered spaces. *Proc. Nat. Acad. Sci. U. S. A.* 26, 29-31 (1940). (Dunford) 1-239.

Harmonic surfaces in Riemann metric. *Trans. Amer. Math. Soc.* 47, 146-154 (1940). (Giraud) 1-271.

Hilbert distances and positive definite functions. *Ann. of Math.* (2) 42, 647-656 (1941). (von Neumann) 3-206.

On a theorem of Tannaka and Krein. *Ann. of Math.* (2) 43, 56-58 (1942). (Cameron) 3-208.

Completely monotone functions in partially ordered spaces. *Duke Math. J.* 9, 519-526 (1942). (Cameron) 4-247.

Analytic and meromorphic continuation by means of Green's formula. *Ann. of Math.* (2) 44, 652-673 (1943). (Martin, W. T.) 5-116.

Group invariance of Cauchy's formula in several variables. *Ann. of Math.* (2) 45, 686-707 (1944). (Martin, W. T.) 6-123.

Boundary values of analytic functions in several variables and of almost periodic functions. *Ann. of Math.* (2) 45, 708-722 (1944). (Martin, W. T.) 6-124.

Compact groups of differentiable transformations. *Ann. of Math.* (2) 46, 372-381 (1945). (Freudenthal) 7-114.

Formal Lie groups. *Ann. of Math.* (2) 47, 192-201 (1946). (Freudenthal) 7-413.

Linear partial differential equations, with constant coefficients. *Ann. of Math.* (2) 47, 202-212 (1946). (John) 7-446.

Bloch's theorem for real variables. *Bull. Amer. Math. Soc.* 52, 715-719 (1946). (Radó, T.) 8-204.

Vector fields and Ricci curvature. *Bull. Amer. Math. Soc.* 52, 776-797 (1946). (Myers, S. B.) 8-230.

Finitely additive set functions and stochastic processes. *Proc. Nat. Acad. Sci. U. S. A.* 32, 259-261 (1946). (Pitt) 8-215.

Stochastic processes. *Ann. of Math.* (2) 48, 1014-1061 (1947). (Doob) 9-193.

Curvature in Hermitian metric. *Bull. Amer. Math. Soc.* 53, 179-195 (1947). (Myers) 8-490.

On compact complex manifolds. *J. Indian Math. Soc. (N. S.)* 11, 1-21 (1947). (Cartan) 9-423.

Curvature and Betti numbers. *Ann. of Math.* (2) 49, 379-390 (1948). (Myers) 9-618.

On spherical partial sums of multiple Fourier series. *Revista Ci., Lima* 50, 85-104 (1948). (Zygmund) 10-529.

Curvature and Betti numbers. II. *Ann. of Math.* (2) 50, 77-93 (1949). (Myers) 10-571.

Diffusion equation and stochastic processes. *Proc. Nat. Acad. Sci. U. S. A.* 35, 368-370 (1949). (Doob) 10-720.

Localization of best approximation. *Contributions to Fourier Analysis*, pp. 3-23. *Annals of Mathematics Studies*, no. 25. Princeton University Press, Princeton, N. J., 1950. (Chandrasekharan) 12-255.

Dirichlet problem for domains bounded by spheres. *Contributions to Fourier Analysis*, pp. 24-45. *Annals of Mathematics Studies*, no. 25. Princeton University Press, Princeton, N. J., 1950. (Brelot) 12-258.

Quasi-analytic functions, Laplace operator, positive kernels. *Ann. of Math.* (2) 51, 68-91 (1950). (Hille) 11-334.

Euler-Poincaré characteristic for locally homogeneous and complex spaces. *Ann. of Math.* (2) 51, 241-261 (1950). (Samelson) 11-617.

Vector fields on complex and real manifolds. *Ann. of Math.* (2) 52, 642-649 (1950). (Myers) 12-283.

Su un teorema di Frobenius per le funzioni di Jacobi. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 9, 327-331 (1950). (Martin, W. T.) 13-26.

Partial ordering in theory of stochastic processes. *Proc. Nat. Acad. Sci. U. S. A.* 36, 439-443 (1950). (Doob) 12-425.

Some properties of modular relations. *Ann. of Math.* (2) 53, 332-363 (1951). (van Veen) 13-920.

Tensor fields with finite bases. *Ann. of Math.* (2) 53, 400-411 (1951). (Chern) 12-750.

A new viewpoint in differential geometry. *Canadian J. Math.* 3, 460-470 (1951). (Lichnerowicz) 14-90.

Die Abstrahlung einer Hohlleiterwelle aus einem kreisförmigen Hohlrohr mit angesetzttem ebenen Schirm. II. Die Lösung des Abstrahlungsproblems für die TM-Welle auf der Grundlage der Maxwell'schen Gleichungen. Arch. Elektrotechnik 37, 87-104 (1943). (Gray) 8-299.

Die Ausstrahlung einer Hohlleiterwelle aus einem kreisförmigen Hohlrohr mit angesetzttem ebenen Schirm. III. Arch. Elektrotechnik 37, 145-170 (1943). (Gray) 8-299.

Die konfluente hypergeometrische Funktion mit besonderer Berücksichtigung ihrer Bedeutung für die Integration der Wellengleichung in den Koordinaten eines Rotationsparaboloids. Z. Angew. Math. Mech. 23, 47-58, 101-118 (1943). (Gray) 5-182.

Die Ausbreitung elektromagnetischer Wellen im konzentrischen Breitbandkabel mit dielektrischen Längsstegen. Arch. Elektr. Übertragung 1, 137-150 (1947). (Gray) 11-705.

Die konfluente hypergeometrische Funktion bei der Berechnung des Schallfeldes einer punktförmigen Schallquelle im Zwischenraum zweier konfokaler Drehparabole und ihrer Entartungen. Ber. Math.-Tagung Tübingen 1946, pp. 49-56 (1947). (Erdélyi) 9-119.

Bemerkungen zu einer Entwicklungsformel aus der Theorie der Zylinderfunktionen. Z. Angew. Math. Mech. 25/27, 245-252 (1947). (German, Russian summary) (Erdélyi) 9-282.

Spezielle Randwertaufgaben. Naturforschung und Medizin in Deutschland 1939-1946, Band 2, pp. 47-52. Dieterich'sche Verlagsbuchhandlung, Wiesbaden, 1948. 11-112.

Elektromagnetische Wellen in Hohlleitern und verwandte Probleme. Naturforschung und Medizin in Deutschland 1939-1946, Band 7, pp. 81-87. Dieterich'sche Verlagsbuchhandlung, Wiesbaden, 1948. (Bouwkamp) 11-296.

Die axialsymmetrische elektromagnetische Strahlung zwischen konfokalen Drehparabolen bei verschiedenen Anregungsarten. Ann. Physik (6) 2, 185-210 (1948). (Erdélyi) 10-417.

Berechnung von Wellenwiderstand und Dämpfung von Hochfrequenzleitungen vom Feldbild des vollkommenen Leiters her. I, II. Arch. Elektrotechnik 39, 79-100 (1948). (Baerwald) 11-759.

Berechnung von Wellenwiderstand und Dämpfung von Hochfrequenzleitungen vom Feldbild des vollkommenen Leiters her. III. Arch. Elektrotechnik 39, 202-215 (1948). (Baerwald) 11-760.

Der Einfluss von Trennfugen auf das Hohlleiterfeld. Arch. Elektr. Übertragung 2, 14-22 (1948). (Bouwkamp) 11-296.

Integral- und Reihendarstellungen für die verschiedenen Wellentypen der mathematischen Physik in den Koordinaten des Rotationsparaboloids. Z. Physik 124, 196-218 (1948). (Erdélyi) 10-453.

Uneigentliche Integrale mit parabolischen Funktionen über einen der beiden Parameter. Math. Z. 52, 355-383 (1949). (Erdélyi) 11-434.

Besondere Reihenentwicklungen für eine häufig vorkommende zweireihige Determinante mit Zylinderfunktionen und ihre Nullstellen. Z. Angew. Math. Mech. 29, 356-367 (1949). (German, English, French and Russian summaries) (Erdélyi) 11-434.

Komplexe Integrale für die parabolischen Funktionen mit dem wesentlich singulären Kern $\exp(-z/2 \cdot \mathcal{I}_0 s)$. Math. Z. 53, 387-402 (1950). (Erdélyi) 12-608.

Bemerkung zur Fourierschen Reihe für die dreidimensionale Greensche Funktion der Wellengleichung des unbegrenzten Raums in den Koordinaten des Drehparabols. Z. Angew. Math. Mech. 30, 125-127 (1950). (Erdélyi) 11-663.

Die asymptotischen Entwicklungen für die beiden parabolischen Funktionen $M_{\kappa, \mu/2}(z)$ und $W_{\kappa, \mu/2}(z)$ bei grossen Werten von z für $-\infty < 4\kappa < +\infty$. Z. Angew. Math. Mech. 30, 133-148 (1950). (German, English, French and Russian summaries) (Erdélyi) 12-97.

Die Summe der reziproken Potenzen der Nullstellen von $M_{\kappa, \mu/2}(z)$ hinsichtlich z . Z. Angew. Math. Mech. 31, 149-152 (1951). (Erdélyi) 12-824.

Der schleifenerregte Hohlraumresonator aus zwei konfokalen drehparabolischen Kappen. Arch. Elektr. Übertragung 6, 6-16 (1952). (Oberhettinger) 13-890.

Die konfluente hypergeometrische Funktion mit besonderer Berücksichtigung ihrer Anwendungen. Ergebnisse der angewandten Mathematik. Bd. 2. Springer-Verlag, Berlin-Göttingen-Heidelberg, 1953. xvi + 234 pp. (Erdélyi) 14-978.

Die Lösungen einer besonderen Whittakerschen inhomogenen Differentialgleichung. Math. Z. 57, 167-192 (1953). (Erdélyi) 14-748.

Ein besonderes uneigentliches Integral über das Produkt zweier regulärer Coulombscher Wellenfunktionen. Z. Angew. Math. Mech. 38 (1958), 115-120. (English, French and Russian summaries) (A. Erdélyi) 20 #1002.

- Some congruences for the Bernoulli numbers. Amer. J. Math. 75, 163-172 (1953). (Whiteman) 14-539.
- Kummer congruences and the Schur derivative. Amer. J. Math. 75, 699-706 (1953). (Whiteman) 15-200.
- Some congruences of Vandiver. Amer. J. Math. 75, 707-712 (1953). (Whiteman) 15-201.
- Note on a formula of Grosswald. Amer. Math. Monthly 60, 181 (1953). (Erdélyi) 14-642.
- A note on orthogonal matrices. Amer. Math. Monthly 60, 253-255 (1953). 14-716.
- Some sums containing Bernoulli functions. Amer. Math. Monthly 60, 475-476 (1953). 15-104.
- A theorem of Glaisher. Canadian J. Math. 5, 306-316 (1953). (Whiteman) 14-1064.
- Weighted quadratic partitions over a finite field. Canadian J. Math. 5, 317-323 (1953). (R. Hull) 15-508.
- Congruences connected with the power series expansions of the Jacobi elliptic functions. Duke Math. J. 20, 1-12 (1953). (Whiteman) 14-621.
- Some sums analogous to Dedekind sums. Duke Math. J. 20, 161-171 (1953). (Apostol) 14-847.
- Some theorems on Kummer's congruences. Duke Math. J. 20, 423-431 (1953). (Whiteman) 15-10.
- A theorem on congruences. J. Indian Math. Soc. (N.S.) 17, 43-45 (1953). (Whiteman) 14-951.
- Note on a theorem of Glaisher. J. London Math. Soc. 28, 245-246 (1953). (Whiteman) 14-726.
- The multiplication formulas for the Bernoulli and Euler polynomials. Math. Mag. 27, 59-64 (1953). (Whiteman) 15-308.
- A theorem of Stickelberger. Math. Scand. 1, 82-84 (1953). (Whiteman) 15-13.
- A reciprocity formula for weighted quadratic partitions. Math. Scand. 1, 286-288 (1953). (Whiteman) 15-509.
- A functional equation for the Weierstrass \wp -function. Math. Student 21, 43-45 (1953). (Sheffer) 15-324.
- Weighted quadratic partitions (mod p^r). Math. Z. 59, 40-46 (1953). (R. Hull) 15-777.
- Some special equations in a finite field. Pacific J. Math. 3, 13-24 (1953). (Whiteman) 14-848.
- Some theorems on the Schur derivative. Pacific J. Math. 3, 321-332 (1953). (Whiteman) 14-951.
- Some theorems on generalized Dedekind sums. Pacific J. Math. 3, 513-522 (1953). (Apostol) 15-12.
- The reciprocity theorem for Dedekind sums. Pacific J. Math. 3, 523-527 (1953). (Apostol) 15-12.
- Some hypergeometric congruences. Portugaliae Math. 12, 119-128 (1953). (Whiteman) 15-507.
- Note on a conjecture of André Weil. Proc. Amer. Math. Soc. 4, 5-9 (1953). (Bergström) 14-848.
- Congruences connected with three-line latin rectangles. Proc. Amer. Math. Soc. 4, 9-11 (1953). (Mann) 14-726.
- Some sums connected with quadratic residues. Proc. Amer. Math. Soc. 4, 12-15 (1953). (Whiteman) 14-621.
- A note on Bernoulli and Euler numbers of order $\pm p$. Proc. Amer. Math. Soc. 4, 178-183 (1953). (Whiteman) 14-1064.
- A note on the multiplication formulas for the Bernoulli and Euler polynomials. Proc. Amer. Math. Soc. 4, 184-188 (1953). (Whiteman) 14-640.
- Remark on a formula for the Bernoulli numbers. Proc. Amer. Math. Soc. 4, 400-401 (1953). (Whiteman) 14-973.
- A note on partitions in $\text{GF}[q, x]$. Proc. Amer. Math. Soc. 4, 464-469 (1953). (Whiteman) 14-952.
- Note on some formulas of Rodeja F. Proc. Amer. Math. Soc. 4, 528-529 (1953). (Goodman) 15-3.
- Note on some partition identities. Proc. Amer. Math. Soc. 4, 530-534 (1953). (Kloosterman) 15-12.
- Note on the class number of real quadratic fields. Proc. Amer. Math. Soc. 4, 535-537 (1953). (A. L. Whiteman) 15-104.
- Permutations in a finite field. Proc. Amer. Math. Soc. 4, 538 (1953). (Whiteman) 15-3.
- A special congruence. Proc. Amer. Math. Soc. 4, 933-936 (1953). (Whiteman) 15-400.
- A note on abelian groups. Proc. Amer. Math. Soc. 4, 937-938 (1953). (Rankin) 15-503.
- The Schur derivative of a polynomial. Proc. Glasgow Math. Assoc. 1, 159-163 (1953). (Whiteman) 15-404.
- Distribution of primitive roots in a finite field. Quart. J. Math., Oxford Ser. (2) 4, 4-10 (1953). (Bergström) 15-13.
- Some congruences for Bernoulli numbers of higher order. Quart. J. Math., Oxford Ser. (2) 4, 112-116 (1953). (Whiteman) 14-1064.
- Note on some partition formulae. Quart. J. Math., Oxford Ser. (2) 4, 168-172 (1953). (Whiteman) 15-201.
- Applications of some basic identities. Quart. J. Math., Oxford Ser. (2) 4, 173-177 (1953). (Whiteman) 15-289.
- Note on a formula of Szily. Scripta Math. 18 (1952), 249-253 (1953). (Whiteman) 14-642.
- Invariant theory of equations in a finite field. Trans. Amer. Math. Soc. 75, 405-427 (1953). (Whiteman) 15-291.
- Pairs of quadratic equations in a finite field. Amer. J. Math. 76, 137-154 (1954). (Whiteman) 15-404.
- Note on the cyclotomic polynomial. Amer. Math. Monthly 61, 106-108 (1954). (Whiteman) 15-508.
